COMPANY PROFILE

Since 1933, Rocky Mountain Orthodontics (RMO®) has been on the forefront of innovation and continuous improvement of products and services in the orthodontic industry. RMO® introduced many advancements to the industry such as: stainless steel, which eliminated the use of precious metals, computer aided diagnostics, and the utilization of metal injection molding (MIM).

These technologies have since become worldwide industry standards due to the effectiveness, accuracy and production efficiencies. Through the years, RMO® has pioneered the industry with a strong emphasis on innovation and collaboration.

RMO® is much more than a business and model of excellence among Colorado corporations; it is the first privately held orthodontic firm in the United States and is a Colorado institution with history tightly linked to Denver and orthodontics itself.

Our People, Our Biggest Asset

Before the advent of Tru-Chrome stainless steel, and prior to the founding of RMO®, orthodontists had to be skilled craftsmen as well as doctors. In fact, much of their time was spent devising, constructing and maintaining their own oral appliances. All of that changed with the development of versatile Tru-Chrome stainless steel alloys coupled with the ingenuity and foresight of RMO®'s founder, Dr. Archie Brusse. Dr. Brusse was a pioneer in orthodontics. He was the AAO President twice and the captain of the football team at Denver University.

With a small but capable staff, and with help from an executive at the American Steel and Wire Company, RMO® set about developing the first set of prefabricated orthodontic appliance system options. Tru-Chrome stainless steel was the major component used in conjunction with the Resistance Welder, versus previous methods which used only precious metals. After much clinical research and experimentation, the first system of appliances was unveiled in 1933 at the annual meeting of the American Association of Orthodontists, in Oklahoma City, OK. Dr. Archie Brusse was an early adherent to the synergistic approach to orthodontic appliances and treatment options.

In time, the impact of these prefabricated devices on the world of orthodontics was dramatic. Simply put, they changed the face of dentistry. The wide variety of appliance shapes and sizes supplied by RMO® enabled orthodontists to treat a diverse array of patients more effectively. RMO® can be proud of the loyalty and the efforts of the employees as well as the local and national commercial suppliers who have helped it succeed and advance during the company's history. RMO® is, by all measures, an international standard, poised to build upon its legacy of excellence for decades to come.

A Family Legacy

In 1949 Founder Archie Brusse's son, Martin, officially joined RMO®. Archie mentored Martin for years, teaching him the complexities of the orthodontic industry as well as how to operate the family business. Martin was one of the original members of the 10th Mountain Division; he served during World War II and received a Bronze Star. Shortly after the war, he went back to Dartmouth University and graduated with a Liberal Arts Degree. In his early years at RMO®, Martin was influenced by the teaching of his Uncle Walt's perspectives on life and business. Additionally, numerous other close friends had significant influence on Martin including; Jack Meehan, Bay Brunson, Sam Bulkley and Martin Hamilton to mention few.

Dr. Archie Brusse's legacy continued and under Martin's leadership, RMO® developed worldwide distribution networks. Currently RMO® Denver serves more than 60 international independent distributors and has a European Subsidiary in France which in turn serves about 30 independent distributors. RMO® was awarded the President's distinguished "E-Star Award for Exports" twice by the U.S. Secretary of Commerce for continued outstanding contributions to the U.S.A.'s Export Expansion Program. RMO® was also honored with the "Excellence in Export" award by the Governor of Colorado on two separate occasions.

Martin met many good friends and business associates but never had children to mentor as his father before him. In the coming years, Martin searched for exceptional individuals to whom he would entrust with his family legacy. Martin realized his goals in two special and capable people he confidently selected to continue his innovative legacy. Tony Zakhem, CEO and Jody Hardy, President uphold the same pride and family-centric ideals as Martin. With an increased emphasis on marketing, Human Resources and technology, Tony and Jody have taken RMO® into the future with creativity and innovation. Strong leadership and the combination of both innovation and experience is what continues to propel RMO® into the future.

Dr. Archie Brusse & Martin Brusse

Jody Hardy CPO/President & Tony Zakhem CEO

Synergistic Solutions for Orthodontists

RMO® has been manufacturing quality U.S. products and services for more than 85 years. With versatile offerings that includes everything from computer-aided orthodontic data services, early treatment systems and functional / fixed appliances.

RMO® recognizes that all patients differ and that orthodontists vary in education, experience, treatment approach, appliance performance, detailing and more. Since the needs of every doctor and patient are different, RMO® is committed to developing practical synergistic solutions. Founded on synergistic solutions, RMO® continues to make it an integral part

of all products and services. Synergy develops when two or more interactive parts of a system produce an effect in which the power of the interactions of the whole become far greater than the sum of the parts. RMO®'s attention to synergies provides practices with a wide selection of dependable treatment options. As the family tradition passed on from Archie to Martin, then to Jody and Tony, we continue to learn from the past to expand into the future.

“Whatever you do - make a contribution, believe in what you do, have fun with it and keep the patient in mind.”

- Archie Brusse

RMO® Headquarters - Denver, CO

RMO® Europe

RMO® Europe was established in 1966 as a wholly owned subsidiary of RMO® Denver. Currently RMO® Europe serves orthodontists via a direct sales force in France and over 30 international distributors throughout Europe and parts of Africa. RMO® Headquarters and RMOE collaborate on product development and sales to bring existing products and new products to customers in the region. RMOE has a staff of 40 people based in Strasbourg, France.

Since 2010 Marc Mayer has served as the President of RMOE and has been with the RMO® family for 30 years. Marc has been involved in all aspects of the company's operations. His hard work, loyalty, and dedication have been fundamental to the success of RMO® Europe.

"RMO believed in Europe and invested to create RMO Europe. Today, when the world is getting so small, both companies work together more than ever to contribute to the orthodontic profession."

Marc Mayer

15 Diagnostic

Rocky Mountain Orthodontics Data Services (RMODS®)

RMODS® is the world leader in providing computerized orthodontic diagnosis. With over 1,000,000 cases analyzed RMODS® has helped thousands of clinicians to determine the best individualized treatment plan possible, based on the doctor's individualized treatment standards.

Tracings

- Lateral and Frontal Tracings
- Upper and Lower Arch Analysis
- Most popular analyses (Ricketts, Jarabak, Steiner, Downs, Sassouni)
- Significant Considerations
- Airway Analysis

Visual Norms

- Visual Norm is an individualized computer composite of a normal population selected by age, gender and race
- Visual Norm enables the practice to visualize the patient's abnormalities by superimposition and image on the tracing

RMO Comprehensive Cephalometric Description

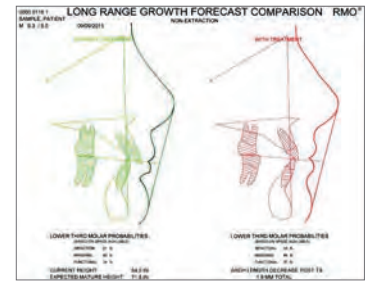

MEASUREMENT	VALUE	UNIT	DEVIATION
SNB	81.0	DEG	0.0
SNP	81.0	DEG	0.0
SNL	81.0	DEG	0.0
SNM	81.0	DEG	0.0
SNR	81.0	DEG	0.0
SNB	81.0	DEG	0.0
SNP	81.0	DEG	0.0
SNL	81.0	DEG	0.0
SNM	81.0	DEG	0.0
SNR	81.0	DEG	0.0

Comprehensive Cephalometric Description

- Report generated for lateral and frontal tracings
- CCD compares over 100 measurements to the individual norms for diagnosis. Significant deviations are highlighted

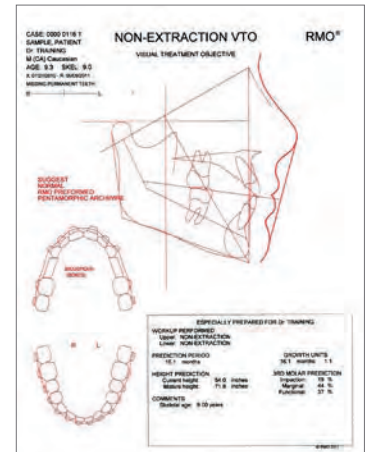

Growth Forecast to Maturity: Treated and Untreated

- Expected profile, skeletal development and dentition are simulated
- 3rd molar space analysis and expected space available
- Patient height to maturity is estimated
- Emphasizes long term treatment plan instead of two year short term plan

Visual Treatment Objective (VTO)

- An individualized post treatment goal
- Takes in consideration the existing skeletal morphology, limitation of skeletal change, expected growth, occlusal function, aesthetics, arch form, crowding, doctor's treatment philosophy and mechanics, extraction or non-extraction and treatment stability

Treatment Design

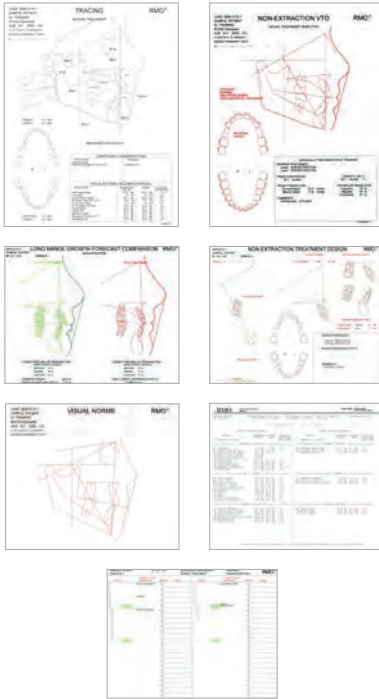

- Shows the tooth and skeletal changes required to achieve the Visual Treatment Objective

Sequence Worksheet

- The tooth movements of the Treatment Design are translated into sequences of events by month. The Progress Control Chart is a guide to keeping on schedule

RMODS® Packages

Description

- Primary Dentition Diagnostic Package
- Lateral Tracing, Lateral Progress, Retention and Final
- Lateral Tracing, Visual Norm

JOE Ceph®

JOE Ceph® is an in orthodontic office, on-screen digitizing software for performing static analysis of lateral, frontal x-rays and dental arches.

- Lateral and Frontal Tracings
- Lower and Upper Arch analysis
- Visual Norms
- Comprehensive Cephalometric Description
- Airway Analysis
- 24 Month Growth Forecast without Treatment
- Superimposition of Different Time Points

Five easy Steps:

- 1) Add a patient
 - 2) Upload images
 - 3) Update Dental Chart
 - 4) Digitize
 - 5) Analyze
- To view a JOE Ceph® demo visit our website www.rmortho.com

Description

- Includes 1 Joe Ceph® license
- Includes 2 Joe Ceph® licenses

Double-Sided Bite Wafers

- Re-inforced aluminum divider reduces the distortion and the risk of piercing
- Soft blue wax. No heating required

Description	Package Contains	Order Number
Package of 24 wafers	1	ECM0100

Golden Divider

Describes/identifies "the divine proportion" in nature. In orthodontics, the divider is used to measure harmonious relationships in the face, radiographs and dental models. Stainless steel - can be sterilized
Size : 165 x 60mm (Closed)

Package Contains	Order Number
1	ECi0394

Bow Divider

- maximum opening 5 cm between the tips

Package Contains	Order Number
1	ECi0395

TMJ Trimeasure

Designed to assist the clinician in measuring TMJ function (mounted on articulator or typodont) in a manner that is reliable and repeatable. A real time saving device. 4 measurements :

- maximum inter-incisal opening
- maximum protrusion
- maximum left lateral excursion
- maximum right lateral excursion

Package Contains	Order Number
1	ECM0070

Mirrors For Intra-buccal Photos

Double sided mirrors. The quality of the silverplating and the glass resist moisture and eliminate picture distortion. Good reflective properties accurately reflect intra-oral detail and colour.

- Reflective power 75%
- 3 mm depth - Sterilization up to 220°C
- Available in convenient shapes to accommodate children and adults.

RMO® X-ray Viewer

X-ray-viewer, thickness of 26 mm ; in aluminum frame.
LED light source for greater luminescence.
Low power consumption and low heat.

- Power : 8W
- Illuminance : 9950 cd/cm²
- Colour Temperature : 6.000 °K
- Lamp Lifetime : 50 000 hours
- Illuminated Surface : 290 x 210 mm
- Size : 365 x 280 x 25 mm
- Power supply : 110/240 V - 50/60 Hz
- Material : Aluminum
- Recommended Temperature : 10 à 40 °C

Package Contains	Order Number
1	ECM0110

RMO® Ortho/Trace - Cephalometric Tracing Paper

Description	Package Contains	Order Number
Thickness 0,076 mm (size 20.32 x 25.4 cm)	100 sheets	J00086
Trace Paper (18 x 24 cm)	100 sheets	ECJ0086

SAM® Articulators

Over the years, the SAM® articulator has become the complementary tool of many orthodontists who want to have a precise means of dynamic analysis of the occlusion of their patients.

It is part of a complete and modular diagnostic system. This articulator is a valuable aid for:

- The diagnosis, by allowing to identify the situations at risk, through the problems of the temporomandibular articulation
- Therapeutic control
- The contention, by its contribution to the manufacture of gnathological positioners
- Orthodontic therapy by elastodonty

EARLY TREATMENT & INTERCEPTION

RMO® provides a variety of early treatment options including many variations of expanders, distalizers and other interceptive appliances. Ideally, it is best for children to see an orthodontist by age 7 in order to determine if orthodontic treatment is required. This is widely considered the best time for patients to begin treatment and/or treatment planning. The first permanent molars and incisors have usually erupted by that time and crossbites, crowding, and other problems can be evaluated.

When treatment begins early, the orthodontist can guide the growth of the jaw and guide incoming permanent teeth. Early treatment can also regulate the width of the upper and lower dental arches, gain space for permanent teeth, avoid the need for permanent tooth extractions, reduce the likelihood of impacted permanent teeth, correct thumb-sucking, and eliminate abnormal swallowing or speech problems. Early treatment can simplify orthodontic treatment for the patients and orthodontist.

STOPPI® (for children from the age of 2 to 4)

Stoppi® is a dental-care alternative to existing sucking habits. STOPPI® has no foreign bodies between the incisors. Therefore the upper and lower jaw can develop normally and the teeth can find their correct position without being disturbed.

Description	Package Contains	Order Number
Unit	1	ECM0166
Kit - 6 pcs	1	ECM0165

Oral Screen - Standard

Even if teeth do not suffer from major malpositioning damaging thumb-sucking habits should be corrected with the assistance of the Oral screen.

The Oral screen:

- promotes the self-healing of existing anomalies
- helps eliminate speech defects
- corrects malfunctions of the tongue
- eliminates harmful mouth breathing
- leads to normal lip closure
- strengthens lip muscles
- supports myofunctional interventions

Description	Package Contains	Order Number
Small model	1	ECM0150
Large model	1	ECM0151
Soft small model (clear)	1	ECM0160
Soft large model (clear)	1	ECM0161

Oral Screen with Bite Caps

Thumb-sucking frequently produces large overbite of the anterior teeth, or deteriorates an existing retroposition of the mandible. In this case the Oral screen with a bite cap is indicated. The bite cap prevents the Oral screen from tipping. The mandible is simultaneously guided forward.

Description	Package Contains	Order Number
Small model	1	ECM0152
Large model	1	ECM0153
Soft small model (clear)	1	ECM0162
Soft large model (clear)	1	ECM0163

Oral Screen with Wire Guard

This form of Oral screen is indicated for an anterior open bite cause by the thumb or by frequent use of a pacifier. It prevents the tongue from inserting between the dental arches and helps closing the open bite.

Description	Package Contains	Order Number
Small model	1	ECM0154
Large model	1	ECM0155

Oral Screen with Pearl

The pearl, held by a wire frame. Guides a tongue with weak muscles toward the palate. His special Oral screen is indicated in the case of Downs syndrome, speech defects or cerebral palsy.

Description	Package Contains	Order Number
Small model OS/P I	1	ECM0156
large model OS/P II	1	ECM0157

The Multi-Family® System

The Multi-Family System Appliances are myofunctional appliances that can be incorporated into your practice during all phases of orthodontic treatment. They are Functional Educational Appliances used as early as 5 years old to reduce muscular forces in the mouth and promote proper alignment of the teeth; or as late as 13 years old, during fixed appliance treatment, to facilitate mandibular positioning. The Multi-Family System is versatile and functional for both you and your patients. The Multi-Family System is easy to use; it does not require impressions or a laboratory fee. The universal design allows for easy inventory management and product identification.

Common Characteristics of the Multi-Family® System Appliances

Lingual Ramp

Properly repositions the tongue

Smiley mark for right positioning

Mono-Bloc Shape

Works on both dental arches simultaneously

Vestibular Shield

Acts as a lip bumper and activates the perioral muscles to diminish labial forces

Raised Occlusal Plane

Promotes proper mandibular positioning and unlocking of the TMJ

MULTI-S® : Multi-Start (for children from the age of 4 to 8)

Designed for children between the ages of 4 and 7 years old, the Multi-S® is suitable for both the primary and mixed dentition patient. The appliance reduces the muscular forces and promotes the proper alignment of the teeth.

Characteristics

- Expanded anterior arch form acts directly on the repositioning of the arch
- Mandibular lingual envelope repositions the tongue in the maxilla
- Inter-molar thickness and an integrated eruption guide unlock the dentition to facilitate proper growth of the mandible
- Inter-digitation of the centrals and laterals, in combination with a midline guide, act to insure the correct positioning of the midline at an early age
- Vestibular bumper diminishes the effect of labial forces
- Appliance is manufactured of a soft silicone material that is readily tolerated by the youngest patients
- Incisors are positioned end to end to insure the appropriate anterior-posterior relationship
- Easily adjustable to each patient. Due to the softness and flexibility of the material it can be easily be sized to fit using a scissors
- Sterilizable at 134°

Wearing Requirements

- The Multi-S® appliance must be worn at least four (4) hours during the day and through out the night. Depending on the needs of the patient, a re-education and breathing exercises program may be prescribed by the specialist.

Multi-Family

Package Contains	Order Number
1	ECXS

MULTI-T2® : Multi Trainer (for children from the age of 6 to 12)

A pre-orthodontic treatment appliance designed to improve facial and dental development in children (mixed dentition) and reduce problems associated with: swallowing, thumb sucking, tongue thrusting, labial dysfunction, respiratory problems. One size fits all.

Characteristics

- **Lingual Envelope** : Ensures the proper repositioning of the tongue in the palate
- **Mandibular Inter-molar Incline Plane** : Maximize mandibular growth potential.
- **Midline Correction** : Ensures proper midline alignment
- **Broadly Defined Tooth Channels** : Guides the dentition into a proper pre-alignment
- **Buccal Bumper** : reduces the muscular forces applied to the mandible

Wearing Requirements

- In the daytime : while reading, at the computer, watching television, doing homework.
- At night : Must be worn all night. In the early days of the treatment it is not uncommon for the appliance to dislodge during the night time. Wearing the appliance regularly during the day will quickly resolve the problem. Remember, a disciplined approach in the use of the appliance is the key to successful treatment.

Package Contains	Order Number
1	ECXT2

Multi-Family

MULTI-TB® : Trainer for braces (for children/adults from 8 to 16 +)

This unique appliance, suitable for both children and adults wearing brackets, incorporates the inter-molar thickness and an increased propulsion guide to facilitate mandibular growth.

Characteristics

- Can be worn with both brackets and bands
- Extended posterior length (exclusive to Multi-T® Braces) permits appliance to be adjusted to suit both children and adult patients
- Buccal and palatal cut-away (exclusive to Multi-T® Braces) to accommodate brackets, bands, quad-helix, palatal arch and other palatal appliances with a transversal action. Expanded anterior arch form acts directly on the repositioning of the arch
- Inter-molar thickness and an integrated eruption guide unlock the dentition to facilitate proper growth of the mandible
- Inter-digitation of the centrals and laterals, in combination with a midline guide, act to insure the correct positioning of the midline at an early age
- Vestibular bumper diminishes the effect of labial forces
- Appliance is manufactured of a soft silicone material that is readily tolerated by the youngest patients
- Incisors are positioned end to end to insure the appropriate anterior-posterior relationship.
- Easily adjustable to each patient. Due to the softness and flexibility of the material it can be easily be sized to fit using a scissors
- Sterilizable at 134° C
- One size fits all

Wearing Requirements

- In the daytime : while reading, at the computer, watching television, doing homework
- At night : Must be worn all night. In the early days of the treatment it is not uncommon for the appliance to dislodge during the night time. Wearing the appliance regularly during the day will quickly resolve the problem. Remember, a disciplined approach in the use of the appliance is the key to successful treatment

Multi-Family

LOW

HIGH

MULTI-P2® : (for children from the age of 6 to 14)

The Multi-P2® is an effective and economic method specifically developed for early orthodontic treatment. The Multi-P2® guides erupting teeth with the help of the patient's own muscle forces to an ideal position in the dental arches. A good occlusion is established and development of severe malocclusions avoided.

Multi-P2® can be used in a wide variety of cases both in deciduous, mixed and permanent dentitions. The method has many advantages whether used independently or in combination with traditional treatment modalities and fixed appliances. The Multi-P2® is simple to use and requires less chair-side time. Treatment costs may also be reduced.

Characteristics

- Horizontal and vertical overbites
- Crowding in the anterior region
- Rotations in the anterior region
- Crossbites of single teeth
- Gummy-smile
- Openbite (thickened high model)
- Distal bite
- Scissors bite

Contraindications

- Class III occlusion
- Midline discrepancies exceeding 3 mm
- Very narrow upper arch

Port

- Day : As active daytime use is a vital part of the treatment, the patient's cooperation is therefore essential. The importance of regular use should be emphasized to the patient, because only regular use can lead to satisfying treatment results. Multi-P2® should be used in periods of 30 to 60 minutes for a total of two hours a day. In case other daily routines of the patient do not allow for periodic use, the appliance can be used for one two-hour period just prior to bedtime.
- Night : The appliance should be worn all night. Once the treatment shows good progress, nighttime use is usually sufficient, making daytime unnecessary. Knowing this will enhance the patient's motivation.

Selecting size

for Multi-P2® • Multi-P2® Wide • Multi-DB® and Multi-DB Wide®

Place the elevated marker between the left maxillary lateral incisor and canine.

Read the scale between the right maxillary lateral incisor and canine. Sizes 10, 20, 30... are indicated with larger markers whereas sizes 15, 25, 35... are indicated with smaller markers.

In case of crowding or diastemas, consider a larger or smaller appliance. Fit Multi-P2 Sizer on the patient and double check that the teeth fits properly in the slots.

Fitting

Fitting is the most important step of size selection. Appliances used for fitting can be sterilized in an autoclave.

Fig. 1. The canine rests at the bottom of its slot and Multi places no mesiodistal-force on the canine. If there is no crowding or risk of crowding, the size in the photo is correct. However, if crowding is present or expected, a larger size should be selected to enable expansion of the arch perimeter.

Fig. 2. One size larger than in Fig.1. The canine is guided by Multi towards the bottom of the canine's slot and applies a force that pushes the canine distally. This size is appropriate if crowding is present or expected and arch perimeter expansion is needed.

Fig. 3. Three sizes larger than in Fig. 1. The appliance is too large. The canine is guided against a ridge between two slots and the appliance does not guide teeth properly. Choose a smaller size. Sterilize Multi in the autoclave.

Without changing your chosen technique, RMO® 3D® 1st Phase FIXED/REMOVABLE® Modular Orthodontics™ (Wilson®) can help your practice target treatment planning decisions to reduce treatment time and cost, and to improve patient comfort and cooperation. This will help your practice grow.

All principles have been proven through successful usage for many decades. What is new and unique is the way the principles were engineered by Dr. William Wilson and Dr. Robert Wilson into an easy-to-use plug-in, plug-out system of 12 modular options. Over 100 different 1st Phase treatment movements can be achieved with minimum number of appliances and maximum patient comfort and satisfaction.

In perspective, the 3D® FIXED/REMOVABLE System (Wilson) should be considered as a comprehensive appliance supplementing system; it is a "tool box" of options. The numerous 3D® options help you add to the effectiveness of the appliances you have chosen to deal with your diagnosis and treatment plan. Also, it is important to note that each 3D® module is a subsystem by itself. That is, each has specific areas for use and each has numerous supplementing options.

3D® Lingual Tube (Wilson®)

- The 3D® Lingual Tube is integral to the 1st phase system because all modules plug into the tubes, creating a full system
- Available with and without prewelded hooks and can be purchased separately or as a preweld on RMO® TruForm® Molar Bands
- New, improved “click-fit” assures positive post seating

Description	Package Contains	Order Number
3D® Lingual Tube	10	A04315
3D® Lingual Tube with Gingival Hook	10	A04314

3D® Buccal Tubes (Wilson®) – Maxillary

- 6° distal offset
- Extended gingival .045" round headgear tube prevents molar tipping when distalizing
- Convertible rectangular cap has consistent force and is easy to remove

Size	Style	Right/Left	Package Contains	Order Number
.018	Bondable	R	10	A08260
.018	Bondable	L	10	A08261

.022	Weldable	L	10	A04363

3D® Buccal Tubes (Wilson®) – Mandibular

- Consists of two rectangular arch slots with a mesial hook
- Reduced friction slot minimizes corner drag when using square or rectangular wire
- Rounded edges for patient comfort
- Increased mesial distal length for increased control

Size	Base	Right/Left	Package Contains	Order Number
.018	Weldable	R	10	A04370
.018	Weldable	L	10	A04371
.022	Weldable	R	10	A04372
.022	Weldable	L	10	A04373

Buccal Tubes

When using 3D Maxillary Bimetric Distalizing Arches with .045" or .051" occlusally placed buccal tubes, it is necessary to adjust the distal buccal section of the arch. A step up bend is made anterior to the Omega Stop assembly. This enables the distalizing elements to function in the occlusally placed tube while the anterior elements of the arch are properly aligned with anterior brackets. RMO® has buccal tubes and tube variations for all popular techniques.

3D® Lingual Arch

- Easy vertical placement and removal
- Mandibular anchorage
- Holding arch for use in both extraction and non-extraction cases
- Mandibular arch length increase, including slight molar distalization

3D® Sectional

- Impacted cuspid activator
- Works as an expander, bicuspid space maintainer and bicuspid space regainer
- Cantilever resistor, molar tip-back resistor
- Easy vertical placement and removal

Description	Package Contains	Order Number
Maxillary Right/Mandibular Left	5	A04345
Maxillary Left/Mandibular Right	5	A04346

3D® Adapter

- Works as a simple space maintainer and expander
- Mandibular and Maxillary molar tip-back resistor
- Cross elastic hook
- Easy vertical placement and removal

Description	Package Contains	Order Number
Maxillary Right/Mandibular Left	5	A04347
Maxillary Left/Mandibular Right	5	A04348

3D® D.Y.S. Module

- Available in .036" and .040" TRU-CHROME® Stainless Steel
- Universal lingual attachment
- Multiple fixed/removable lab-made appliances for individual needs

Description	Wire Size	Package Contains	Order Number

10 - 78mm	3	A04259

3D® Transfer System

- Reduces time consuming laboratory related procedures
- Laboratory impression can be taken during active treatment (No need to stop treatment)
- Laboratory can produce very accurate Fixed/Removable appliance
- A time/cost saver; excellent for in-practice and outside 3D laboratory appliance fabrication procedures

Description	Package Contains	Order Number
3D® Transfer Insert	10	A04198
3D® Transfer Lingual Tube	10	A04199

3D® Space Maintainer

- Second bicuspid space regainer
- Temporary fixed/removable functional space maintainer/bridge
- Easy vertical placement and removal

Description	Package Contains	Order Number
Maxillary Right/Mandibular Left	5	C00131
Maxillary Left/Mandibular Right	5	C00132

Space Maintainer Kit

Description

34 preformed Truform seamless universal bands - 1 each of sizes 11 through 27 - both in maxillary and mandibular, 10 open end maintainers and 10 occlusal bar-type maintainers

Package Contains	Order Number
1	K00005

Open End Maintainer

Description

.040" (1.02mm) stainless steel
Occlusal bar-type

Package Contains	Order Number
10	C00130
10	C00141

RM Quad Helix (Removable)

- Continuous controlled force application
- .036 (0.914mm) TRU-CHROME® Stainless steel

Description	Package Contains	Order Number
1 - 21 mm	3	A01230
2 - 23 mm	3	A01231
3 - 24 mm	3	A01232
4 - 26 mm	3	A01233
Assortment, one of each size	4	K00722

Maxillary Quad Helix (Ricketts®)

- Continuous controlled force application, solder to bands
- For rotation or stabilization of molars, to expand, or contract the arch
- Blue Elgiloy® unheat-treated .038" (0.965mm)

Description	Package Contains	Order Number
1 - 14mm	3	A00510
2 - 18mm	3	A00511
3 - 24 mm	3	A00512
4 - 28mm	3	A00513
5 - 37mm	3	A00514
Assortment, one of each size	5	K00690

Preformed Blue Elgiloy® Quad Helix

- Continuous controlled force application, soldering not required
- For rotation or stabilization of molars, to expand, or contract the arch
- Easy insertion with straight and curved lingual sheaths
- Blue Elgiloy® unheat-treated .036" (0.914mm)

Description	Package Contains	Order Number
0 - 34 mm	2	A01430
1 - 36 mm	2	A01431
2 - 37 mm	2	A01432
3 - 43 mm	2	A01433

Quad Helix Preformed Banana - Stainless Steel

The Quad helix Banana is removable and easily activated :

- Possible molar movement and control by Quad Helix arches, buccal and lingual rotation, expansion and contraction
- Ideal for bilateral expansion of posterior teeth, cuspids and molars
- Ideal for Asymmetrical expansion of posterior teeth or molars
- Continuous controlled force application

Description	Package Contains	Order Number
0 - 34 mm	3	ECM1270
1 - 37 mm	3	ECM1271
2 - 38 mm	3	ECM1272
3 - 46 mm	3	ECM1273
Banana lingual sheath	10	ECA0196

INTRAORAL & EXTRAORAL

RMO® offers a complete line of intraoral and extraoral products to meet all your orthodontic needs!

RMO®'s intraoral line offers a myriad of elastic options, including our famous Energy Chain™ (which is exclusively distributed by RMO®), as well as a variety of accessory products like impression trays, alginate, patient relief wax, mouth guards, cheek retractors and more. Extraoral products include a variety of options including headgear, facebows and Spring Gear® (distributed exclusively by RMO®).

CONTENTS

- 40** Elastomerics
- 46** Impression Trays
- 49** Retainer Cases
- 50** Liberty Bielle™
- 52** Herbst Appliances
- 52** RMO® Facebows
- 53** Bumpers
- 54** Masks
- 57** Extraoral Products
- 60** Lingual Retainers & Wires

Energy Chain™ Elastics

- Superior elastic memory following initial stretch
- Manufactured using special elastomeric materials exclusive to RMO®
- Spacing variation between modules allows proper selection, retraction, ligating, etc.
- Latex-Free, non-toxic, non-staining

.394" (10mm)	Gray	25 sticks	J00333

Rotation Wedges

- Produces rotational force by snapping perforated tab over tie wings of bracket, inserting arch wire in groove of wedge and ligating opposite tie wings of bracket to arch wire
- Wedge acts as fulcrum between bracket and arch wire
- 10 ligatures per stick
- Latex-free

Color	Package Contains	Order Number
Gray	5 sticks	J00174

Ligatures, Tough-O®

- Higher force retention over standard ligatures
- .118" (3.0mm) outside diameter
- Same material as Energy Chain™
- Latex-Free

Package Contains	Order Number
30 sticks (20 ligs/stick)	ECJ0180

O-Ring Ligatures

- Manufactured with the same elastomeric material as RMO Morita chain, strong and attractive
- A minimum of deformation between visits
- Economical
- Foam dispenser floor to facilitate the loading of the placement instrument
- Latex-free

Description	Package Contains	Order Number
O ring ligature clear	500	ECJ0178
O ring ligature grey	500	ECJ0179

IMPRESSION TRAYS : DISPOSABLE IMPRESSION TRAYS, ALUMINIUM IMPRESSION TRAYS

Disposable Impression Trays

- Made from FDA-approved styrene
- Features smooth, rounded edges, anterior retention slots and vertical perforations for enhanced material retention
- Anatomically correct design, with a palatal ridge for optimum fit, makes for greater patient comfort
- Ideal for use with RMO® Ortho-Jel® Alginate or any other impression material

Size	Color	Package Contains	Order Number: Maxillary
Small	Blue	10	J01233
Medium	Green	10	J01234

Kromogel® Alginate

Neutral vanilla flavour, dust free. Three colour guide takes the guessing out of impression taking. High elasticity and high tear strength. Smooth creamy mix. New mixing time of just 30 seconds. Place in the mouth for a minute and remove when alginate turns white. Extremely simple and easy to use.

Description	Package Contains	Order Number
Kromogel - 500g	10	ECJ0250
Kromogel - 500g	2	

Essential Alginate

High quality, fast setting mint flavoured alginate for all your impression needs.

Description	Package Contains	Order Number
Essential Alginate - 500g	10	ECJ0255

Ortho-Jel® Silicone

Low viscosity precision impression material based on addition curing vinyl silicone delivered in cartridges. It can be extruded directly onto the teeth or the tray.

Description	Package Contains	Order Number
Cartridge 50ml	2	ECJ0260
Cartridge Gun	1	ECJ0263

Ortho-Jel® Putty

Ortho-Jel® Putty is used as a base impression material for the (one step) two phase impression technique in conjunction with Ortho-Jel® Silicone. Ortho-Jel® Putty is a soft but not sticky, kneadable precision impression material based on addition curing vinyl silicone. Ortho-Jel® Putty is easy to mix and shows good setting properties

Description	Package Contains	Order Number
400g	2	ECJ0261

Ortho-Jel® Adhesive

Tray adhesives are recommended to assure reliable adhesion of impression material to the impression tray and to avoid uncontrollable deformation during impression taking.

Description	Package Contains	Order Number

intraoral & extraoral

IMPRESSION TRAYS : PLICAFOL, ALGINATE, MOUTH GUARDS

Plicafol

Separating foil for taking correction impressions. Plicafol is an extremely elastic, flexible foil without tendency for elastic recovery after elongation. Thus, it is ideal for the foil technique and for manufacturing custom-made trays directly at the chair side. As a result the dentist gains time and precision.

Description	Package Contains	Référence
20 sheets	1	ECJ0265

Orthocaps Shade Guide

For ordering the friction pads in the color of the patients teeth.

Package Contains	Order Number
1	OC3010

Alginate Flavor

- Can be used with any alginate
- Taste and flavor friendly
- 4 to 6 drops only per try - 2oz bottle

Cup with lid	2	ECM0282
Mixing bowl	1	ECM0285
Spatula	1	ECM0286
Water measuring cup	1	ECM0287

Mouth Guards

- Comes in standard black and 3 fun colors/flavors
- Flavored Mouth Guards designed to fit with braces
- Safety design creates spacing between jaw and skull for protection from injuries
- Quick-release tether for flexibility of use across several sports
- Comes with reusable storage case for mobility
- Custom molding can be done using boil-and-bite procedure (standard black only)

Description	Color	Package Contains	Order Number
Standard	Black	1	J00555
Braces, Blue Raspberry	Blue	1	J00556
Braces, Fruit Punch	Red	1	J00557
Braces, Bubblegum	Pink	1	J00559

Retainer Case

- Made of high impact polypropylene, prevents breakage
- Easy-open finger holds with durable hinge and positive-click closure
- Built-in keyhole to carry on key chain or backpack
- Ventilation holes that prevent odors
- Standard size holds upper or lower retainers or a positioner
- Lab size holds bionators or special lab appliances

Liberty Bielle®, an alternative for orthopedic & orthodontic treatments

The Liberty Bielle®, the newest addition to the RMO® Functional Education® System, is a Herbst-type appliance. Its unique design allows it to rotate 360 degrees, maximizing lateral movement and providing comfort, flexibility for the patient, and treatment efficiency to the doctor. The Liberty Bielle® consists of an assortment of precisely engineered and manufactured components of the highest quality.

These unique components increase the durability of the appliance by minimizing destructive lateral forces and allowing maximum movement of the mandible in many directions. The Liberty Bielle® is easy to adapt to any standard bracket, wire and tube fixed appliance system. Combined with your edgewise therapy, multiple orthodontic and orthopedic objectives can be achieved simultaneously.

Locking mechanism (similar to RM® Lock) in closed position with wire engaged

Arch locking mechanism

Locking mechanism closed onto wire

Arch wire slot

Ball joint allows 360° movement.

Fulcrum Herbst Appliance - OHA (Orthèse Herbst-Amoric)

Herbst appliance with sliding pivots allowing a certain lateral movement. You just need to slide the pivot along the wire into the desired position and tighten it with the self-blocking screw. Once in position it is integrated into a thermoforming plate. The manufacturing time is reduced with no risk of weld failure. By matching herbs and a removable appliance we benefit from better tools to orient the growth.

Description	Package Contains	Order Number

Flex Developer 2.0:

- A Ball pin
- B Looped end
- C Prefabricated guide wire
- D Spring rod
- E Locking end with hook, can be reopened/relocked

What's new ?

1. Increased patient comfort due to encapsulated design
2. The hook of the locking end disappears entirely behind the prefabricated guide wire
3. Easy alignment of the Looped and Locking ends with laser etched longitudinal lines
4. Secure fixation using fixation points

by **Tiger Dental**

Flex Developer 2.0

The Flex Developer (FD) is a highly efficient class-II corrector that achieves tooth movement as well as triggers mandibular growth. Therapeutic force values remain constant even after millions of bending cycles, allowing for class-II-correction in the shortest possible time.

An additional indication is mandibular space-closure, especially following extraction or due to congenitally missing teeth.

If desired, distalization of maxillary teeth is also possible. Operators love the Flex Developer due to its robustness and fracture resistance.

In addition to moving teeth dentally, the device also has a functional effect. This stimulates the patient to position the mandible forward and induces Herbst-like mandibular growth. Biting in centric occlusion remains possible due to the device's exceptional flexibility.

The spring action is created using a fracture resistant, constantly flexible polyamide-rod. As a result, the FD can be shortened to any length and thinned down to any diameter.

In this fashion forces between 50 – 1,000 cN (cN ~ g) can be selected. Because the FD is secured to a sectional mandibular guide wire, it delivers a mesializing force to the lower molars that is especially useful in closing mandibular spaces. The FD leads to bodily tooth movement of 1 mm/month and can also be used unilaterally.

Set of both a maxillary and mandibular	2	P00067

Bite Bumper™

- Bite-Bumpers work in open and deep bite cases by allowing the anteriors to ride up and out of occlusion
- Guarantees the correct height on the lingual of the tooth and makes sure the two Bite-Bumpers are 100 % parallel
- The Bite-Bumpers are made of a composite polymer that is more comfortable, aesthetic and will increase biocompatibility in nickel sensitive patients

Package Contains	Order Number
10	ECM8103

Orthopedic Face Mask (Delaire) Stainless Steel

- Excellent method for intercepting Class III cases caused by maxillary insufficiencies
- Modifies orientation of the maxilla, in relation to the upper cranial implantation
- Improves the growth of the anterior part of the maxilla
- Can cause mesial movement of the upper dento-alveolar arch, in relation to the maxillary base
- Can cause distal movement of lower dento-alveolar arch, in relation to mandibular base
- Heavy forces applied throughout treatment by elastics attached to anchorage points
- Made of .078" (1.98mm) wire and acrylic, set screws held in metal housing in acrylic parts. Vertical height adjustable to 13/16" (2cm)
- Elastics and wrench included

Description	Package Contains	Order Number
Standard size	1	J00410
Large size	1	J00411
Replacement elastics, 1/4", 32 oz.	1,000 approx.	J01182

Adaptable Class III Mask

The protocol for many orthopedic facial mask treatment of Class III cases requires very heavy forces to be applied to the craniofacial complex. In these cases, the Adaptable Class III mask is an ideal choice. Elastics with combined force levels from 1 to 7 kilograms couple the face mask to an intraoral appliance(s) to elicit forward movement of the maxilla as a whole, rotation of the maxillary pyramid or movement of both arches.

Forehead Rest

- Patient comfort is maximized with ample coverage for stability and heavy force diffusion
- Hydrasorb™ foam liner
- Shatter resistant Biocryl II construction

Chin Cup

- Peripheral design offers laterally extended coverage to diffuse force over the mandible while avoiding the soft area near the lip and under the chin
- Hydrasorb™ foam liner

Mouthbow

- Looped ends for patient safety
- Radial locking block is repeatedly adjustable from low to high pull
- Welded crossbar

Description	Package Contains	Order Number
Blue with a bag, purse replacement pads and key	1	ECJ0290
Replacement elastics 1/2" (1,27cm), 16 oz (454g)	1000	J01175
Replacement protection pads - White	4	ECJ0290C

Reverse Pull Face Crib (D^R Carl Gugino)

The Reverse-Pull Face Crib was initially designed for the correction of maxillary insufficiencies and mandibular prognathism. As orthodontists reported additional applications for the forward pull of the crib (class II and closing spaces), refinements were made. A chin cup was added to improve stability. The frame was modified to prevent shifting even during sleep. The mouthbow was redesigned to increase tension potential and optimal patient safety. Due to lightweight stainless steel construction and face fitting conformity the necessity of headstraps has been eliminated.

- **Class III:** Allows forward pull to bring the maxillary arch forward
- **Class II:** Allows forward pull on the mandibular arch. Ideal for moving teeth (individual or segment) forward.

Description	Package Contains	Order Number

Reverse pull without TMJ loading Indications for treatment Midfacial Orthopedics, Dental Arch Protraction Postorthognathic Surgery, TMJ Management

Adjustment Points

- Ensure a perfect fit for every face
- 30% angulation for comfort along tissue contours

Mouthbow

- .075 gauge wire
- Increased stability and tension potential
- Used with your choice of intra-oral anchor

Design Features

- Headstrap, greater stability, especially during sleep
- Adjustable Cheekbone rests
- Moulded of light weight plastic

Grummons Protraction Class III Mask	1	ECJ0292
Replacement protection pads	1	ECJ0299

The Langlade Reciprocal Arch and Mini Chin Cup (for class II corrections)

Developed by Dr Michel Langlade, the reciprocal arch and mini chin cup offer a comfortable, effective and safe alternative to headgear. Since the appliance is more comfortable to wear, especially during the hours of sleep, patient compliance problems are minimized.

The reciprocal arch appliance is worn 24 hours per day with Class II elastics, applying a reciprocal force to both arches. It may be removable or ligated to the upper arch. The reciprocal chin cup is worn at home to protract the lower arch and increase the maxillary headgear force making the dental correction faster and easier.

Reciprocal arch:

- Easy adjustment
- Well tolerated (children & adults)
- Invisible (under upper lips)
- Patients wear the appliance 24 hours per day
- Reinforces Class II elastics effect
- Bumper effect
- Avoid headgear use
- Can be used with lateral 0.45 tube & reciprocal mini chin cup

The mini chin cup is recommended for the malocclusion of Class II in the case of retrusive lower arch and lower retrusive cuspids and/or incisors with microdontie, anodonties, agenesises.

- Easy to adjust
- Well tolerated (children & adults)
- Easy to wear (home hours & sleeping)
- Efficient headgear effect
- Very fast correction
- Can avoid surgery in borderline skeletal adult cases
- Very helpful in cases where you need to close/or to open spaces and to bring the lower arch forward.

Description	Package Contains	Order Number
Reciprocal arch with headgear tubes welded at the level of the cuspids on the reciprocal arch. Recommended for use in combination with the mini chin cup	1	ECJ0295
Mini Chin Cup Designed to be inserted into the headgear tubes on the reciprocal arch with Class II elastics of Class II fixed to the hooks of the mini chin cup and the mandibular vestibular tube on the first molar	1	ECJ0296
Replacement pad for the mini chin cup	1	ECJ0297

Spring Gear®

- Comfortable, washable neck pads
- Continuously exerts the same force on the teeth regardless of head movement
- NiTi Coil spring to insure same force regardless of head movement

Description	Package Contains	Order Number
Spring-Gear®	1 Spring-Gear	J00521
Replacement Neck Pads	10	J00525

High Pull Headgear

Description	Package Contains	Order Number

3-Strand Flat Lingual Retainer Wire

A bonded, flat wire for permanent or semi-permanent retention of tooth position after treatment is well known. Bonded to the lingual surface, it is aesthetic, unobtrusive, and requires little patient cooperation.

- Made of fully annealed 302SS 3-Strand wire
- Wire is thin and flat, with dimensions of .010 x .028 (0.25mm x 0.71mm)
- Full annealed to allow for intricate formation
- 6'' (152mm) Lengths
- Wires are sold in packs of 10 per tube.

Description	Package contains	Order Number
.010 x .028	10	W3L0510

TRU-CHROME® Stainless Steel Retainer Wire, No. 2 Temper

- Retainer Wire, No. 2 Temper is softer than arch wire, which enables the operator to more easily form the wire into retainer appliances
- Forming of the wire work-hardens the wire and provides a working resiliency for those types of appliances
- Length = 35,56cm

Diameter	Package contains	Order Number
.028" (0,711mm)	10	E00080
.030" (0,762mm)	10	E00081
.032" (0,812mm)	10	E00082
.036" (0,914mm)	10	E00083
.040" (1,016mm)	6	E00084

TRU-CHROME® Stainless Steel Retainer Clasp Wire

- Clasp Wire Temper is between the resilient arch wire and the retainer wire
- It is soft enough to be instrument formed to the clasp configuration
- Forming gains sufficient hardening for the pliering to have satisfactory spring resiliency for clasp
- Length = 30cm

Diameter	Shape	Package contains	Order Number
.028" (0,711mm)	Round	5	E00065
.032" (0,812mm)	Round	5	E00064

05

BANDS

RMO® was the first company to develop orthodontic bands, which have been fundamental to the progress of orthodontics. Techniques have changed, and materials have improved; moving from precious metals, to stainless steel preformed orthodontic bands. The application of stainless steel made it possible to provide greater edge strength, improved fit qualities and more aesthetically pleasing appliances.

RMO®'s exclusive manufacturing process and special tempered raw material allow for greater strength and snap fit properties. RMO® bands incorporate rolled occlusal edges to maximize bond strength and control excessive bonding material. Bands continue to be an important component in the RMO® product line.

RMO® Molar Band Marking Specifications

RMO® Molar Band Markings and Features

- Easily withstands stress from external appliances
- Anatomical design – right and left shape for precise and comfortable fitting
- Size identification and Palmer notation are permanently marked to withstand heat sterilization
- Sizes are proportionately graduated for use on primary molars and first permanent molars
- Durable to withstand forces and will not collapse during seating

First Maxillary Molar Right and Left

Band Trays

- RMO® offers a complete band storage and chairside dispensing system which fits with the permanent marking system. These versatile, space-saving series of storage and dispensing units are capable of holding all RMO® bicuspid and molar bands
- Each of the formed compartments in the trays vary in size to accommodate greater quantities of the most commonly used sizes
- Each printed tray format includes a formed tray and a clear, locking lid. Each tray includes a label that indicates type of band, maxillary, or mandibular

Bicuspid Molar Base	100	A00767

Wilson® 3D® Lingual Tube

- Designed to accept Lingual 3D Fixed/Removable Modular Orthodontics (Wilson) appliances.

Description	Package Contains	Order Number
Tube without hook	10	A04315
Tube with gingival hook	10	A04314

**Ellis-type Lingual Tube With Locking Knob**

- For .036" Ellis prefabricated lingual arches

Description	Package Contains	Order Number
Regular	10	A00173

**Solderable Lingual Post**

- Use only with the lingual tubes A00173 and A00178

Description	Package Contains	Order Number
For .036" lingual arch wire	10	A00236

**Horizontal Lingual Tube**

Description	Package Contains	Order Number
For .036" wire	10	A00148

**Horizontal Lingual Tube**

- With distal retention notch

Description	Package Contains	Order Number
For .036" wire	10	A00149

**Horizontal Lingual Tube**

- With occlusal welding flange

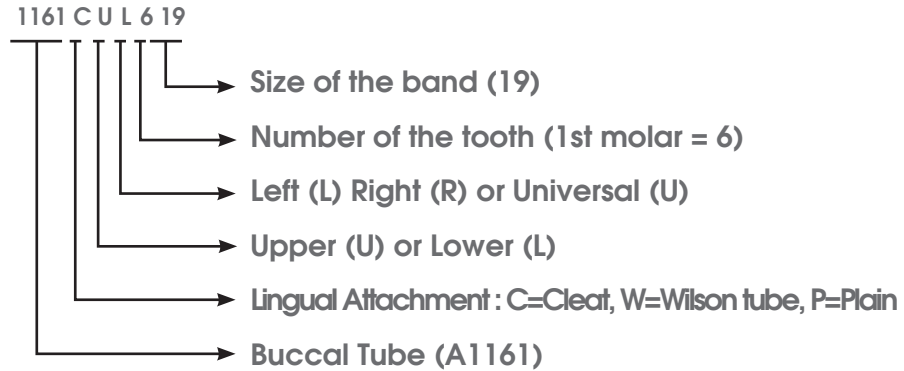

Description	Package Contains	Order Number
For .036" wire	10	A00186

Smart Part Number reading of a Prewelded Band

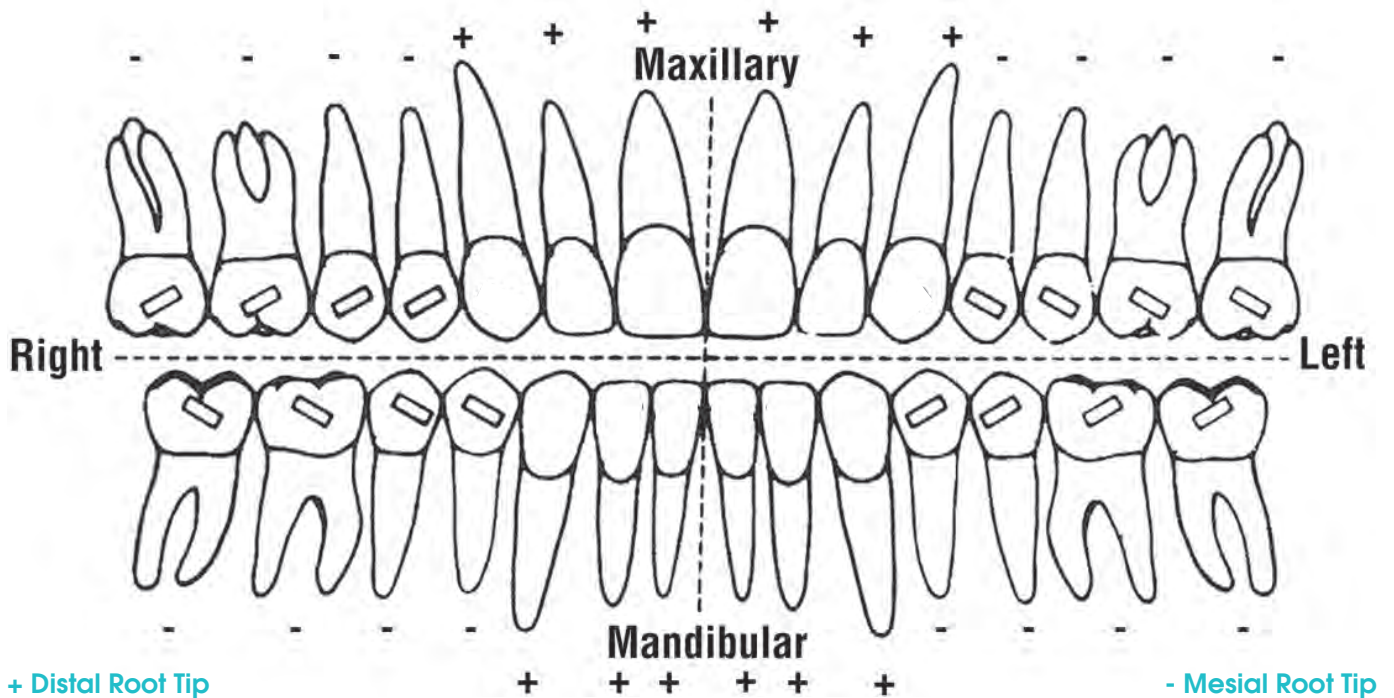

Each component of a prewelded band is detailed in the catalog, it may be interesting for you to identify them. By reading a preweld part number you will be able to identify all three components (the buccal tube, the band and the lingual attachment).

Here is an example of the following preweld part number: **1161CUL619**

Angulation Guide

- Orders for angulated attachments will be positioned and angled per the standard technique of the specific attachment, unless otherwise specified.

Position Guide

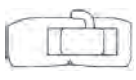

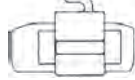

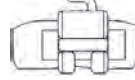

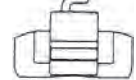

- The weld positions illustrated are standard and will vary according to the specific attachment and technique. Weld positions are subject to change as new techniques introduce new variations. RMO proudly offers the flexibility of custom placement assemblies for all prewelds per customer specification. Please allow additional fabrication time for all custom placement assemblies.

BRACKET SYSTEMS

When it comes to the highest quality MIM manufactured metal brackets, RMO®'s extensive line caters to offices everywhere. The versatile Synergy line of brackets provides a tri-wing and smooth rounded arch slot walls and floor that reduces both friction and treatment time.

RMO®'s FLI® Twin bracket designs offer the highest quality in true twin design with patient comfort in mind.

Aesthetic brackets are preferred by patients who want the fastest, most efficient treatment with brackets so clear they're nearly invisible! With bracket options ranging from the flagship FLI® Clear to the economical, yet high strength FLI® Composite, there's a perfect option to meet each patient's individual needs.

The RMO® line of self-ligating brackets are designed to move teeth most efficiently with fewer adjustments, giving you and your patients the most reliable and predictable results. With RMO®'s passive and active options, there's something for every office to keep the individual patient in mind.

RMO® Metal Brackets

When it comes to the highest quality, MIM manufactured metal brackets, RMO®'s extensive line caters to offices everywhere.

Altitude SL®, RMO®'s **passive self-ligating** metal brackets, are the solution to low-friction technology that deliver trusted results and treatment efficiency attained by easy door activation and optimal sliding mechanics for effortless wire changes

Alpine SL®, RMO®'s **active self-ligating** metal brackets, deliver stellar control and performance. Optimal rotational control is easily achieved with the full slot clip coverage while easy operation allows for faster adjustments.

The versatile **Synergy®** line of brackets provides a tri-wing design that reduces both friction and treatment time. With smooth, rounded contours, **FLI® Twin** brackets offer the highest quality in true twin design with patient comfort in mind. Named for its totally integrated design, the **Integra™** bracket has a center scribe for easy placement and an aesthetically pleasing size that patients enjoy.

Altitude SL® Brackets

RMO®'s Altitude SL® Brackets are the new solution to low-friction, passive self-ligation technology that delivers trusted results and treatment efficiency. Fast and efficient treatment is attained by effortless door activation and optimal sliding mechanics. Altitude SL® offers reliable strength in construction combined with a smooth rounded profile for enhanced patient comfort.

- MATERIAL:** 17-4PH Stainless Steel Pad
- BASE:** 304 Stainless Steel 80-gauge Mesh
- PRESCRIPTIONS:** Roth & MBT™
- SLOT SIZE:** .018 & .022

FEATURES

Smooth, Rounded Profile
 Ball End Hook
 Optional Ligation
 Torque-in-Base
 Two-Piece Mesh Construction
 Smooth Rounded Slot Lead-in
 Patented Rail Design
 Door Notch
 Door Closed Gingivally
 Base Palmer Notation
 17-4PH Grade SS

BENEFITS

Enhanced patient comfort
 Added patient comfort through minimized cheek irritation
 Ideal finishing and ligation
 Optimal slot alignment reduces guesswork and chair time
 Consistent and predictable bonding
 Easy wire placement and insertion for quicker wire changes
 Lower friction and binding on wire
 Provides reliable, stable door retention
 Quick and easy to open and close
 No instrument required
 Keeps door closed positively with chewing
 Easy, permanent bracket identification
 Molded for high strength and rigidity

Altitude SL® M Brackets

Emphasizing more on inter-bracket distance, lower frictional resistance, and smoothness. We have created an extra small profile, rounded slot edge, and a fully rounded contour design.

Altitude SL® M, the self-ligating bracket that gives you more control and comfort from start to finish.

MATERIAL: 17-4 PH Stainless Steel

BASE: 304 Stainless Steel 80-gauge Mesh

PRESCRIPTION: Roth

SLOT SIZE: .018 & .022

FEATURES	BENEFITS
MIM technology	High level precision
Fully rounded contour design	Extra comfort
Extra small profile design	Increased inter-bracket distance
Patented locking mechanism	Opening with a regular probe and easy closing with a finger
Sheet metal slot and rounded slot edge	Reduced frictional resistance
80-gauge mesh base	Superior bonding strength
Laser mark on the base	Easy bracket identification

Alpine SL® Brackets

It's all about precision, speed and control with the fully interactive metal Alpine SL® bracket. The Nickel Titanium spring delivers continuous and consistent forces without the risk of deformation during the entire length of treatment.

BRACKET MATERIAL: 17-4PH Stainless Steel

BASE MATERIAL: 316L Stainless Steel, 80-gauge Mesh

PRESCRIPTIONS: Roth, MBT, Bioprogressive, Trimorphic Brachyfacial, Trimorphic Mesofacial and Trimorphic Dolichofacial

SLOT SIZE: .022 or .018

FEATURES

NiTi Spring Clip

Easy Open and Close Function

Full Slot Width

Smooth Low-Profile Surface

Tie Wings

Ink Mark and Palmer Notation

Contoured Base

80-Gauge Foil Mesh Base

BENEFITS

Shape memory alloy ensures reliable clip operation and control for entire treatment

No special tool is required to open; Closes gingivally with slight pressure using figure on the incisal curve or using instrument

Clip offers full slot coverage allowing for optimal rotational control

Smooth surface finish offers exceptional patient comfort

Ample undercuts allow for optional ligation with chains and ties

Easy bracket identification

Anatomical tooth fitment and greater tooth control

Increased locking action

Synergy® Brackets

Synergy® brackets are the most versatile brackets on the market. The tri-wing design provides more treatment options than conventional twin brackets with added features that dramatically reduce friction and total treatment time.

MATERIAL: 17-4 PH Stainless Steel

BASE: 316L Stainless Steel 80-Gauge Foil Mesh

PRESCRIPTIONS: SWLF®, Roth, Bench, Std. Edgewise, Ricketts Bioprogressive Classic, Ricketts® Bioprogressive® Original, Trimorphic Brachyfacial, Trimorphic Mesofacial and Trimorphic Dolichofacial

SLOT SIZE: .018 & .022

FEATURES

Tri-wing design

Rounded arch slot walls

Rounded arch slot floor

Permanent ID marking

Center scribe

Two-piece MIM, 80-Gauge Mesh Pad

Torque-in-base

BENEFITS

Maximizes tooth-by-tooth control via Friction Selection Control (FSC)

Decreases friction and keeps wire from binding

Simple wire insertion

Reduces friction since arch wire contacts at only two points

Quick and accurate identification

Offers precise bracket placement

Consistent, strong and predictable bonding

Provides optimal slot alignment and reduces chair time

Synergy R® Brackets

Synergy® brackets are the most versatile brackets on the market. The tri-wing design provides more treatment options than conventional twin brackets with added features that dramatically reduce friction and total treatment time. Synergy R® adds the convenience of a convertible cap design for enhanced treatment options on the cuspids and bicuspids

- MATERIAL:** 17/4 PH Stainless Steel
- BASE:** 316L Stainless Steel 80-Gauge Foil Mesh
- PRESCRIPTION:** SWLF
- SLOT SIZE:** .018 & .022

FEATURES	BENEFITS
Tri-wing design	Maximizes tooth-by-tooth control via Friction Selection Control (FSC)
Rounded arch slot walls	Decreases friction and binding of wire
	Simple wire insertion
Rounded arch slot floor	Reduces friction since arch wire contacts at only two points
Permanent ID marking	Quick and accurate identification
Center scribe	Offers precise bracket placement
Two-piece MIM, 80-Gauge Mesh Pad	Consistent, strong, predictable bonding
Convertible cap	Allows for passive treatment options without the use of ligatures
Torque-in-base	Provides optimal slot alignment and reduces both guesswork and chair time

FLI® Twin Brackets

RMO®'s FLI® Twin Brackets offer high quality in true twin design. Smooth, rounded contours assure both gentle aesthetics and enhanced patient comfort. The FLI® Twin bracket system features a color quadrant identification system and tooth specific pads to improve bonding efficiency and reduce chairtime. Chamfered facial lead-ins and a flared entry support quick and easy wire changes.

MATERIAL: 316 L Stainless Steel

BASE: 316L Stainless Steel 80-gauge Foil-Mesh™ - 80 Gauge

PRESCRIPTIONS: Roth, MBT™, & Ricketts® Original Bioprogressive®

SLOT SIZE: .018 & .022

FEATURES

Flared mesial-distal lead-in (FLI) design

Chamfered facial lead-in

Two-piece MIM, 80-Gauge Mesh Pad

Low-profile

Color quadrant & Permanent ID marking

Center scribe

Torque-in-base

BENEFITS

Minimal wire binding and kinking

Simple wire insertion

Allow easy labial wire insertion

Consistent, strong, predictable bonding

Smooth, comfortable design ideal for all patients

Quick and accurate identification

Offers precise bracket placement

Provides optimal slot alignment and reduces guesswork and chair time

Mini Twin Brackets

RMO®'s Mini Twin bracket is a low-profile design that has all the features of a larger bracket in a compact design

MATERIAL: 17-4 PH Stainless Steel

BASE: 304 Stainless Steel 80-gauge Mesh

PRESCRIPTIONS: Roth, MBT, Standard Edgewise & Bioprogressive

SLOT SIZE: .018 & .022

FEATURES

Low profile design

Color quadrant & Permanent ID marking

Center scribe

BENEFITS

Reduces labial interference

Assures patient comfort

Aesthetically pleasing

Quick and accurate identification

Offers precise bracket placement

Bioprogressive Mini Twin hook on cuspid/bicuspid, 5-5	KM13202

INTEGRA™ Brackets

RMO®'s low profile bracket, Integra, has a totally integrated design. The complete bracket, including the base, is molded as one unit and is manufactured using metal injection molding (MIM) giving it great strength in an aesthetically pleasing size.

MATERIAL: 316L Stainless Steel

BASE: Integrated 1-piece design has a contoured, molded base that matches tooth anatomy.

PRESCRIPTIONS: Roth, Ricketts® Original Bioprogressive®

SLOT SIZE: .018 & .022

FEATURES

Low profile design and smooth contours

One-piece MIM manufactured

RMO® base molded pattern

Contoured base

Permanent ID marking

Center scribe

BENEFITS

Assures patient comfort and decreases impingement

Strong, integrated bracket

Provides optimal bond

Matched tooth morphology for maximum contact area and consistent bonding

Quick and accurate identification

Offers precise bracket placement

i-TTR Lingual System

The intelligent lingual treatment with torque, tip and rotation (i-TTR) control. The bracket presents two slots for round arches and a rectangular central slot for an auxiliary insert, which permit a progressive modular control of all tooth movement. This can be used for all teeth, including molars.

Description	Package Contains	Order Number
i-TTR Lingual Bracket	10	M00700
i-TTR Lingual Bracket Kit (Double brackets for first and second molars)	36	KM00700

RMO® Aesthetic Brackets

RMO®'s self-ligating brackets are designed to move teeth most efficiently with fewer adjustments, giving doctors and patients the most reliable and predictable results. Low-friction brackets give patient comfortability, while keeping treatment control in mind for the most precise finish. With RMO®'s passive and active options, there's something for every office to keep the individual patient in mind:

Ascend SL®, RMO®'s **passive self-ligating** aesthetic brackets, are the solution to low-friction technology that deliver trusted results and treatment efficiency attained by easy door activation and optimal sliding mechanics for effortless wire changes

Alpine SL® Clear, RMO®'s **active self-ligating** aesthetic brackets, deliver stellar control and performance. Optimal rotational control is easily achieved with the full slot clip coverage while easy operation allows for faster adjustments.

Ascend SL® Brackets

Ascend SL® offers a true balance of strength and durability to deliver brilliant full aesthetics. Fast and efficient treatment is achieved through ultra-low friction and optimal sliding mechanics. Opening and closing is also effortless in supporting quick wire changes.

MATERIAL: Composite Dominant Hybrid - 97% Polyurethane (composite) 3% Alumina Oxide (ceramic)

PRESCRIPTIONS: Roth & MBT

SLOT SIZE: .018 (smaller door) & .022 (larger door)

FEATURES

Fully Transparent
Smooth, Fully Polished Surfaces
Stain Resistant
Hybrid Composite Formula

Smooth Rounded Slot Lead-in
.025" Arch Slot

Gingivally Closing Door
Precision Door and Notch
Click' Mechanism

BENEFITS

Unmatched aesthetics and natural appearance

Exceptional patient comfort

Natural aesthetics maintained throughout treatment

High fracture strength and hardness

Provides smooth, low friction slot

Easy wire placement and insertion for quicker wire changes

Active on .025" wires without binding

Maximized torque

Door stays shut while chewing

Effortless and reliable opening/closing with tweezers or finger

Audible door close

Alpine SL® Clear Brackets

Alpine SL® Clear is the most advanced, transparent self-ligating system. The Nickel Titanium clip allows for easy open and close and requires no special tool to activate.

BRACKET MATERIAL: Polycrystalline Alumina Ceramic
CLIP MATERIAL: Nickel-Titanium, Rhodium Coated Finish
PRESCRIPTIONS: Roth, MBT
SLOT SIZE: .022
BASE: Mechanical – X Form

FEATURES	BENEFITS
NiTi Spring Clip	Shape memory alloy ensures reliable clip operation and control for entire treatment
Easy Open and Close Function	No special tool is required to open; Closes gingivally with slight pressure using figure on the incisal curve or using instrument
Full Slot Width	Clip offers full slot coverage allowing for optimal rotational control
Smooth Low-Profile Surface	Smooth surface finish offers exceptional patient comfort
Tie Wings	Ample undercuts allow for optional ligation with chains and ties
Ink Mark	Easy bracket identification
Contoured Base	Anatomical tooth fitment and greater tooth control

Alpine SL Clear MBT Prescription - Kits

Description	.022
Alpine Self Ligating Clear Mbt 022 - Kit 5-5 With Hook 3/4/5	ECKQ12102

FLI® Clear Brackets

FLI® Clear Brackets offer natural aesthetic appeal to patients with the same reliable functionality preferred by doctors.

Ligation: Tie wings incorporate undercuts and downdraft for easy and secure ligation

Finish: Fully transparent for unmatched aesthetics

Reduced Friction: Smooth rounded flared archslot lead-ins for reduced friction

Finish: Smooth rounded surface for exceptional patient comfort

Base: Patented mushroom style base rails deliver superior mechanical bonding

Base: Contoured design provides optimum adaption to tooth surfaces

MATERIAL: Polycrystalline Clear Ceramic – 99.9% Pure Alumina Oxide

PRESCRIPTIONS: Roth, MBT, & Bioprogressive

SLOT SIZE: .018 & .022

FEATURES

Tie wings with deep undercuts and downdraft

Fully transparent

Smooth, polished surfaces

Low-profile with rounded contours

Smooth, flared archslot

Patented mushroom style base

Contoured base design

Polycrystalline Ceramic

BENEFITS

Easy, more secure ligation

Unmatched aesthetics and true natural appearance

No cloudy appearance as compared to traditional ceramics

Exceptional patient comfort

Improved sliding mechanics – less binding

Less friction than traditional ceramics

Superior bond performance and strength

Consistent debonding – greater confidence without sacrificing strength

Optimum adaptation to tooth surfaces

Unmatched clarity and improved fracture strength

Signature III Brackets

The Signature III bracket line is an aesthetic ceramic twin bracket which combines a dovetail base for reliable bonding with unique rounded features at the slot wall junctions for decreased internal bracket stresses and increased strength. This combination eliminates the common causes of failure among most ceramic brackets on the market today.

MATERIAL: Extruded Polycrystalline Alumina (ceramic)

PRESCRIPTIONS: Roth, MBT, Ricketts Bioprogressive, RMO Bioprogressive, & Standard Edgewise

SLOT SIZE: .018 & .022

FEATURES

Rounded junctions in arch slot

Dovetail base design

Smooth, rounded surfaces

Torque-in-base

Color quadrant marking

BENEFITS

Eliminates stress points on slot; designed for strength with ceramic aesthetics

Reliable mechanical bond

Consistent retention

Simplified debonding

Patient comfort

Provides optimal slot alignment and reduces both guesswork and chair time

Quick and accurate identification

FLI® Composite Brackets

FLI® Composite Brackets offer an economical aesthetic twin option in a high-strength one-piece polyurethane.

MATERIAL: Medical Grade Polyurethane Composite

PRESCRIPTIONS: Roth, Standard Edgewise, Bioprogressive

SLOT SIZE: .018 & .022

FEATURES

Tie wings with deep undercuts and downdraft

Fully transparent

High strength polyurethane

Smooth, polished surfaces

Low profile with rounded contours

Smooth, flared archslot

Patented mushroom-style base

Contoured base design

Micro-etched base

BENEFITS

Easy, more secure ligation

Unmatched aesthetics and true natural appearance

Improved ductility and fracture resistance under tensile stresses

No cloudy appearance as compared to traditional ceramics

Exceptional patient comfort

Improved sliding mechanics - less binding

Reduced friction over traditional ceramics

Superior bond performance and strength

Consistent debonding - greater confidence without sacrificing strength

Optimum adaptation to tooth surfaces

Added bond strength from surface undercuts to grip adhesive

No plastic primers needed for bonding

FLI® Composite Silver & Ceramic Silver Brackets

New Composite and ceramic aesthetic brackets with silver archslots to replace brackets with yellow or white gold. These new silver archslots provide improved strength and torque control. They combine aesthetics and efficiency.

MATERIAL: Medical Grade Polyurethane Composite or Ceramic

PRESCRIPTIONS: Roth, Bioprogressive

SLOT SIZE: .018 & .022

FEATURES

Tie wings with deep undercuts and downdraft

Fully transparent

High strength polyurethane

Smooth, polished surfaces

Low profile with rounded contours

Smooth, flared archslot

Patented mushroom-style base

Contoured base design

Micro-etched base

BENEFITS

Easy, more secure ligation

Unmatched aesthetics and true natural appearance

Improved ductility and fracture resistance under tensile stresses

No cloudy appearance as compared to traditional ceramics

Exceptional patient comfort

Improved sliding mechanics – less binding

Reduced friction over traditional ceramics

Superior bond performance and strength

Consistent debonding – greater confidence without sacrificing strength

Optimum adaptation to tooth surfaces

Added bond strength from surface undercuts to grip adhesive

No plastic primers needed for bonding

Esthetys Classic Brackets

The esthetys classic series offers the strength and esthetic features of ceramic in a quality polyurethane bracket.

Esthetys brackets are manufactured using the most advanced processes and the highest quality material to ensure maximum strength while providing a smooth friction-reduced finish resistant to discoloration. Traditional composites brackets are manufactured with polycarbonate and include a ceramic powder to further strengthen the material. The disadvantage of this material is that it is very brittle and it is necessary to add a metal insert to make the assembly rigid.

Esthetys polyurethane brackets do not require this additional process and offer the highest level of strength while keeping an exceptional esthetic aspect.

- Incorporated angulation, torque and offsets
- Ease of ligation
- Anatomically contoured base for ease of placement
- A large choice of techniques (Edgewise .018 and .022, Roth .018 and .022 - Bioprogressive .018)
- Integrated hooks

TUBES & ACCESSORIES

FLI® Series Buccal Tubes deliver superior performance in an extremely small package. With Metal-Injection-Molded (MIM) construction for smooth comfortable contours, the ultralow profile design features enhanced mesial openings that make wire insertion a snap. Combined with RMO®'s anatomical bases, the FLI® Series is ideal for both direct bond and molar band applications.

The FLI® system of buccal tubes has been expanded. An increased number of choices for torque in both maxillary and mandibular tubes are available. There are also Mini 2nd molar tubes that are very popular due to their small size and large, flared lead-in design.

TADS

Experience the latest generation of appliances — Dual-Top TADs exclusively distributed by RMO®. The Dual-Top Temporary Anchorage Device system provides efficient and flexible biomechanics.

Dual-Top TADs significantly enhance treatment capabilities and can be extremely effective in reducing treatment time, surgeries and extractions. Appliances can be inserted chairside by the doctor and loaded immediately.

RMO® carries a variety of torque drivers. Orthonia provides a variety of speeds and torque options to prevent TAD failure.

CONTENTS

190 Dual-Top TAD System Kit

191 Tads

193 Accessories

196 Topjet & Powerscrew

199 Topclip & Anchor Plates

Dual-Top Temporary Anchor Devices (TADs)

- Manufactured with surgical grade titanium alloy
- Self-drilling and self-tapping, with sharp fluted tips
- Reverse buttress thread design
- Smooth upper transmucosal shaft

Dual-Top TAD System Kit

- Includes 14 of the most commonly types and sizes of TADs
- The storage block has a layout for easy storage and TAD identification, with the thread diameters and TAD lengths etched into the block
- Storage block allows for repeated sterilization

Hand Driver Body

Description	Package Contains	Order Number
110mm	1	ECG0232

Lingual Driver for TAD

- Designed to be used for inserting and removing Dual-Top TADs
- Designed to be detachable for easy sterilization
- Easy implant at maxillary and mandibular jawbone area
- Enable user to control driver with only one-hand
- Shafts sold separately

Description	Package Contains	Order Number
Manual lingual driver	1	ECG0233

Torque Limiting Driver

- Prevents over torque
- Convenience and simple setup
- Safe implant placement
- Torque range: 6N-cm to 30N-cm
- Tool comes apart for convenient sanitation
- Compatible with existing instruments
- Shafts sold separately

Description	Package Contains	Order Number
Manual torque driver	1	ECG0234

Orthonia Torque Driver

- Reverse rotation function is effective for safest TAD removal
- 2 convenient speeds - low (15 RPM) and high (20 RPM)
- Convenient and easy to set up-user friendly designed LCD and push button control panel
- Torque limit range from 10N-cm to 30N-cm
- Safety feature engages when torque limit is exceeded
- Driver adapter for straight shaft included
- Used with RMO® product codes ECG0110, ECG0210, ECG0310

Description	Package Contains	Order Number
Battery powered torque driver	1	ECG0235
Orthonia battery	1	ECG0235-P

Driver Adapter for Contra-Angle (included in kit and sold separately)

- Easy access to difficult to reach areas such as: palate, retromolar pad
- Adapter rotation accommodates insertion angles
- Used with RMO® product codes ECG0100, ECG0200 and ECG0300

Description	Package Contains	Order Number
Driver Shaft Holder	1	ECG0236

Driver Shafts for Contra Angle & Hand Driver Body

Description	Package Contains	Order Number
Button Driver Shaft for Contra Angle - 25mm	1	ECG0100
Cross Driver Shaft for Contra Angle - 18,5mm	1	ECG0200
Bracket Driver Shaft for Contra Angle - 28mm	1	ECG0300
Button Driver Shaft for Hand Driver Body - 70,5mm	1	ECG0110
Cross Driver Shaft for Hand Driver Body - 71mm	1	ECG0210
Bracket Driver Shaft for Hand Driver Body - 70mm	1	ECG0310

Pilot Drill 1mm Diameter

Mini storage bloc	1	ECG0230-2
Storage bloc	1	ECG0230-3

Dual-Top Book

Description	Package Contains	Order Number
Book	1	ECG0237

TAD NiTi Coil Springs with Eyelets

- Stainless steel eyelets are attached to each end of the closed NiTi coil spring to easily engage various appliances
- Wire diameter of .010" and inside coil diameter of .030"

Description	Package Contains	Order Number
7mm	10	G00304
9mm	10	G00301
12mm	10	G00302
15mm	10	G00303

TAD NiTi Coil Springs with Oval Eyelets

- Stainless steel eyelets attached to NiTi Coil Springs
- Pear-shaped opening allows for easy and secure attachment to **Button Top TAD**
- Wire diameter of .010" and inside coil diameter of .030"

Description	Package Contains	Order Number
8mm	10	G00305
10mm	10	G00306
12mm	10	G00307

Permanent Force Springs

- 2 sizes
- 5 force levels (50, 100, 150, 200 & 250g)
- Constant forces during unloading
- Force identification on spring

Description	Package Contains	Order Number
9mm	10	ECG0350
12mm	10	ECG0351

Crimpable Hooks

- Designed for rectangular wire .016" x .022" through .019" x .025"
- Angled head improves access to the posterior region

Description	Package Contains	Order Number
Crimpable Hook	10	A00129
Long Crimpable Hook	10	A00130

Crimpable Hook Pliers

- Helps to attach crimpable hooks securely to the arch wire
- Angled head improves access to the posterior region

Description	Package Contains	Order Number
Schweickhardt Crimpable Hook Plier	1	i00129
Apex Series™ Crimpable Hook Plier	1	T00130
Crimpable Hook Plier	1	ECi0987

Step Plier

- Adapts bimetric distalizing arches for use with occlusal headgear tubes

Description	Package Contains	Order Number
Step Plier - .75mm	1	T00132
Step Plier - 1mm	1	T00134

3D® Maxillary Distalizing Arch

- The Wilson® 3D® Maxillary Bimetric Distalizing Arch has been modified for use with TADs
- Energy Chain™, ligature wire or coil spring is used to connect the TAD with the gingival hook on the appliance
- Customized Distalizing Arches can be fabricated using components of the Wilson® 3D® Bimetric Arch (A04127-A04129, A04150-A04154) and the Omega Adjustable Stop (A04124)

Assorted Kit	-	-	K00930

Topjet

The TopJet is a unique molar distalizer as it can be inserted easily chairside with absolut no laboratory step.

If used unilaterally only one orthodontic miniimplant (OMI) is necessary to anchor it. Insertion time usually is around 10 minutes including the placement of the OMI.

With 250 cN or 350 cN the handler has two strength sizes available and the TopJet clix is also available as a special model in a longer length of more than 8 mm. With full spring tension the smallest installation distance between mini anchor screw and trans-palatal arch is 14 mm, with the largest being 28 mm. With 0.8 mm/month a molar can be distalised by up to 15 mm using TopJet clix.

Description	Package Contains	Order Number
Topjet Clix Distalizer 250g	1	ECT0510
Topjet Clix Distalizer 250g + 8mm	1	ECT0511

TopStop Space Maintainer

The TopStop Space Maintainer serves to anchor molars and provides ideal retention after prior distalisation with the TopJet. The TopStop Space Maintainer is available in the "direct" and "TPA" versions.

Description	Package Contains	Order Number
TopStop TPA - 1 side	2	ECT0410
TopStop direct - 2 sides	2	ECT0411

PowerScrew

The PowerScrew is a double telescope screw for use in palatal expansion devices. It is available in three sizes (8, 12 and 16 mm installation size). Activation is simple, as the 8 cm long flat spanner can be quickly and safely used by the patient on the hexagonal screw.

Narrow palates need a small expansion screw. The PowerScrew therefore grows with it. By simply changing the hexagonal screw for the next biggest, the expander can continue to be used without making a new one.

The PowerScrew and its retention arms are extremely stable and can withstand the greatest forces and torques. One turn (6 surfaces) equals 1 mm expansion (0.17 mm per surface); every second surface is marked with increasing points.

Indications

Expansion of skeletally narrow upper jaws

Contraindications

Age-dependent, ossified palatal expansion

Field of Application

- Expanders with splints or Bands
- Hybrid Expanders
- Purely bone-borne expanders

Advantages

- Small body, high stability
- Changeable hexagonal nut
- Easy self activation by the patient with precisely fitting flat spanner
- More comfort due to rounded design
- Invisible in the mouth

by **Tiger Dental**

TopClip

Connector to create a stable rotary and angular connection with the Dual-Top™ mini implant.

The TopClip system is a special orthodontic component that provides a rotary stable and fixed-angle linkage between the mini implant and the tooth (direct link) or between the anchor mini screw and the hook or ring (indirect link). Despite its stability it can be removed very easily thanks to the patented C-clip anchorage.

The Dual-Top™ implant (JS, JA and G2) function as a safe and sustainable anchor. The TopClip is a 30 mm long SS seldedge wire (.017x.025") with a C-clip for easy attachment on a dual-top implant.

The device enables retention and directly guided tooth motions. The C-shaped clip is attached (clipped) onto the screw head.

Anchor Plates

This Anchor Plate is made of pure titanium suitable for osseointegration and tissue integration. Anchor plate is developed to provide intraoral absolute anchorage for the intrusion or distalization of molars. This plate has three positions: head, arm and body. Jeil's Anchor Plate does not disturb any kind of tooth movement because they are placed outside the dentition. Furthermore, this plate is the most distinctive feature of SAS in comparison with orthodontic implant systems.

ADHESIVES

RMO®'s TruLock® Bonding System offers consistency, an unbeatable less-tacky viscosity and very minimal drift. The TruLock® product line assures optimal strength and can be applied to various surfaces giving versatility in treatment. RMBond® Indirect Bonding System provides clinicians a simple solution for maximizing practice efficiency and delivers a step-by-step process that allows doctors to fundamentally reduce the amount of chair time involved when bonding appliances to a patient.

The FlashMax P4 has the highest peak output intensity of any LED Curing Light on the market. These units provide less heat in handling without sacrificing power and efficiency. Enhanced sustainability through improved internal controls and programming make this light the only choice for your practice.

TruLock® Light Activated Adhesive

TruLock® Light Activated Adhesive is a single paste resin-based, fluoride containing bracket adhesive that requires no mixing, resulting in reduced waste, improved performance consistency and no working time constraints.

- Application: Bonds metal, ceramic and plastic/composite materials to enamel
- Shelf Life: 30 months from manufacture date
- Curing: Minimum output 600 mW/cm² and wavelength 400-500 nanometers

Description	Package Contains	Order Number
Light Activated Adhesive (5g Syringe)	4 each	J04000
Light Activated Adhesive (40 X .35g Capsule) 14g	1 each	J04001
Light Activated Bonding Resin 7ml	1 each	J04002
Light Activated Kit - 4 x 5g Syringes, 2 x 3ml Bonding Resin, 7ml Etchant Liquid, Brushes, Spatula, Mixing Pad	1 each	K00070
Light Activated Kit - 40 x 0.35g Capsules, 7ml Bonding Resin, 2 x 4g Etchant Gel Syringes, Tips, Brushes, Mixing Pad	1 each	K00071
Light Activated Mini Kit - 5g Syringe, 3ml Bonding Resin, 3ml Etchant Liquid, Brushes, Spatula, Mixing Pad	1 each	K00072
Light Activated Mini Kit - 5g Syringe, 3ml Bonding Resin, Brushes, Spatula, Mixing Pad, (NO ETCHANT)	1 each	K00073
Light Activated Kit - 4 x 5g Syringes, 2 x 3ml Bonding Resin, Brushes, Spatula, Mixing Pad, (NO ETCHANT)	1 each	K00074

TruLock® Light Activated Flowable Adhesive

The Radiopaque, resin-based, microhybrid flowable composite contains fluoride and is an organic matrix based on Bis-GMA resin. Currently available in A2 Shade. Can be used for multiple applications, including indirect bonding.

Description	Package Contains	Order Number
2g Syringe, 5 Tips	1 each	J04004

TruLock® Primer Activated Adhesive

TruLock® Primer Activated Adhesive is a paste-primer orthodontic formula. The unique filler and primer combination produces an ideal bond and a smooth viscosity minimizing bracket drift or movement.

- Application: Bonds metal, ceramic, and plastic/composite materials to enamel
- Shelf Life: 30 months from manufacture date
- Curing: Self cured with paste and primer

Description	Package Contains	Order Number
Primer Activated Adhesive (jar), 14g	1 each	J04010

Primer Activated Kit - 4 x 3.5g Syringes, 12ml Primer, Brushes, Spatulas, Mixing Pad, (NO ETCHANT)	1 each	K00085

TruLock® Light Cure Band Adhesive

TruLock® Light Cure Band Adhesive is a single paste resin-based, fluoride containing band adhesive. The single paste adhesive requires no mixing resulting in reducing adhesive waste, consistent adhesive performance and no working time constraints. A distinctive blue color allows you to easily see the adhesive during banding, making clean up easy.

- Application: TruLock® LC Band Adhesive is a single-paste, resin-based, light-cured, fluoride-releasing paste used for cementation of orthodontic appliances to teeth
- Appearance: Blue, opaque paste with medium viscosity
- Shelf Life: 30 months at 25° C and 60% humidity
- Curing: Light Cured by using a standard curing light (600 mW/cm2 minimum output) for 20 seconds. **FlashMax P4 cure time 1-3 seconds**

Description	Package Contains	Order Number
Light Cure Band Adhesive, 5g Syringe	1 each	J04003
Light Cure Band Adhesive, 5g Syringe	4 each	J04005

TruLock® Conditioners

TruLock® Conditioners are primers that help provide the optimal bonding surface for adhesives. The metal conditioner is used for amalgam, gold or stainless steel surfaces. The plastic conditioner is used on plastic brackets, composite restorations or acrylic appliances. The porcelain conditioner can be used on any ceramic appliance that will be enamel bonded.

- Application: TruLock® Conditioners are used in addition to etching to provide a stronger and more robust bond between various surfaces. Each conditioner may be applied to its respective surface to condition the surface for bonding
- Appearance: Clear colorless liquid
- Shelf Life: 30 months. Recommended storage range is 2°C/36°F to 27°C/80°F

Description	Package Contains	Order Number
Porcelain Conditioner, 15ml	1 each	J04022
Metal Conditioner, 15ml	1 each	J04023
Plastic Conditioner, 15ml	1 each	J04024

TruLock® Etchant

TruLock™ etching gel system ensures uniform etching of the tooth and easily rinses off without staining. The gel is green in color, to ensure precise placement on the tooth. Disposable tips provide more protection against cross-contamination.

Description	Package Contains	Order Number
Etchant Liquid 7ml	1 each	J04020
Etchant Gel (12g Syringe)	1 each	J04021
Long Nose Etchant Gel Tip	25 each	J04025

RMBond® - Indirect Bonding

- Reduces chair time
- Significantly more comfortable bonding experience for patient
- Convenient and more precise final appliance placement on a study model at doctor's leisure
- Reduces clinician neck and back pain by minimizing time bent over a patient during bonding procedure
- No need for two models – study model also functions as IDB model

Description

Round rope wax 11" length
 RMBond® Inner Tray Material
 (2x 48ml Cartridges + 10 Mixing Tips)

“Jumbo Etch” Gel

- Convenient syringe storage and dispensing system
- 50 ml syringe dispenses 60 g of etching gel (phosphoric acid 35 %)
- Advantages: Ease of use, pre-measured, precise application, consistency
- Minimum two year shelf life

Description	Package Contains	Order Number
Kit : 50 ml 1 dispensing tip 40 pointed tips 3 empty syringes (3 ml)	1	ECM8075
Replacement tips	100	ECM8076

Prophy Paste

- For use in cleaning the teeth prior to etching
- For professional interproximal cleaning
- Fine granulation for optimal cleaning without unnecessary abrasion
- Non-splattering for very clear rotation
- Free of fluor, pleasant fruit flavour

Unité de Vente	Réf.
1	ECM8023

FlashMax P4 Light Curing Pen

- Highest output intensity of LED curing lights
- Light tip can adjust $\pm 15^\circ$ for better access to distal regions of the mouth; 8 mm light tip is ideal for use with fixed appliances.
- Economical unit provides less heat without sacrificing power and efficiency
- Treat the upper and lower arches with maximum efficiency using the bilateral control buttons. Identical control buttons on either side allow you to rotate the light to achieve the best angle for maximum bond strength
- A battery-operated, cordless hand unit that provides maximum office flexibility and convenience
- Three curing modes for enhanced bonding versatility and operating efficiency

- Peak Output Intensity: 6,000 mW/cm²
- Curing Modes: 1s/3s
- Wavelength: 440 nm – 480 nm
- Weight : 120g
- Battery: LiFePO₄
- Recharge Time: 2.5 hours
- Dimensions: 225mm x 25 mm
- Manufacturer Warranty: 2 years

Mini Led Ortho 2

Cure in a simple gesture, in few seconds from few brackets to a whole quadrant

- Large photo-initiator compatibility**
 Relevant wavelength spectrum: Camphoroquinone (CQ) 470nm but also PPD and PAB 430 nm
 Large power range from 1250mW/cm² to 3000mW/cm²
 Customizable modes to polymerize diverse materials in various clinical situations
- Ortho friendly**
 Customizable exposure times of 4, 8, 12 and 32 sec, specifically studied to move from one bracket to another or to cure a full arch
- Customizable signal**
 An alert (beep, micro-flash, mixed or no alert) prompts the user to move to the next curing position every 4 sec
- Well-balanced combination**
 Cordless light handpiece easy to grip
 Robust body in aluminium
 Li-Ion battery with no memory effect
- Efficacy and safety**
 Cure any type of material used in orthodontics efficiently and quickly. The absence of UV reduces heat production for maximum comfort and safety
- Long lasting battery**
 MiniLED Ortho 2 can cure 15 patients at maximum power, no need to recharge it during the day

Glass Ionomer Cement for Orthodontic Bonding GC Fuji

GC Fuji I

The biocompatible, resin-free luting solution with 25 years of great clinical success. Fuji I, GC's first luting GI cement, is widely used across the world.

- Chemical adhesion to tooth structure, ensuring an excellent marginal seal
- A moisture-tolerant solution when a dry field cannot be assured
- Quick and easy without the need for etching and bonding of the tooth
- Rubbery consistency during setting for an easy removal of excesses
- Resin-free cement for patients allergic to methacrylates
- Virtually no post-operative sensitivity: a pulp-friendly solution

Description	Package Contains	Order Number
(Powder 15 g, liquid 7 ml, conditioner 6,5 ml & accessories)	1	ECM8088
Package of 50 capsules	1	ECM8090

GC Fuji PLUS

Fuji PLUS has been designed to offer you simple and error-free cementation procedures and a strong and durable bond you can rely on. The outstanding performance and the availability in various shades make GC Fuji PLUS a multi-purpose cement.

- A moisture-tolerant solution when a dry field cannot be assured
- Quick and easy without a need for complicated bonding procedures
- Rubbery consistency for easy removal of excess
- Pulp-friendly with virtually no post-operative sensitivity
- Proven and predictable performance for most routine cases
- Also available in extended working time (EWT) version for long-span bridges

Description	Package Contains	Order Number
Package of 50 capsules	1	ECM8081
Full kit (powder 15 g, liquid 7 ml, conditioner 6,5 ml & accessories)	1	ECM8082

Unilateral Cheek Retractor

- With an extra long handle. Transparent and non-reflective (blue-tinted)
- Well accepted by the patient
- Can be autoclaved

Description	Package Contains	Order Number
Small size	2	ECM0107
Standard size	2	ECM0108

Cheek Retractors

- Suction rings allow for use of hands-free suction for increased efficiency
- The addition of handles creates on-demand ability to increase clearance in hard to reach posterior areas
- Two sizes create additional sizing options for patient comfort
- Sterilization and autoclave-approved to increase office efficiency
- Wide opening creates a full view for bonding of anterior and posterior teeth

Description	Package Contains	Order Number
Cheek Retractor with Handle	1	J00405
Cheek Retractor, Adult	1	J00406
Cheek Retractor, Child	1	J00407

Cheek Retractors

- Made of autoclavable polycarbonate
- Easy to snap into place
- Allows a clear view and working area
- Comfortable for the patient
- Non-reflective, ideal for photography, oral surgery, scaling, restorative bonding, ...
- Sterilisation at 121°C

Description	Package Contains	Order Number
Small size	2	ECM1331
Standard size	2	ECM1330

Cheek Retractors

- Includes extensions which may be held by the patient.
- Retractor can be widened to suit
- Available in 3 sizes and 4 colours
- Cold sterilisation or at 121°C

Description	Package Contains	Order Number
Small size (6,5 cm between commissures) (red, green, blue, yellow and white)	1	ECM1333
Medium size (9 cm between commissures) (red, green, blue, yellow and white)	1	ECM1334
Large size (10 cm between commissures) (red, green, blue, yellow and white)	1	ECM1335
Soft medium size (clear)	1	ECM1337

Disposable Tongue Retainer

- One time use, retains the tongue during bonding procedures
- Relaxes the patient. Lateral saliva evacuation holes and additional holes for breathing and/or the attachment of a safety lanyard if required

Package Contains	Order Number
50	ECM1349

Aspiration Cheek Retractor

- An ideal device for insuring a dry bonding surface
- Autoclavable

Description	Package Contains	Order Number
Aspiration Cheek Retractor	1	ECM1325
Y Connector	1	ECM1325-Y

Spherical Bur 0.08

- Designed for the removal of excess composite at the bracket base. air-jet cooling
- Max force: 0,2-0,5 N = 20-50 grs
- Max speed: 5,000 t/min

Description	Package Contains	Order Number
Turbine FG	5	ECM1031
Contra-angle CA	5	ECM1041

Bur 0.12

- Designed for the removal of excess composite distant from the bracket. air-jet cooling or spray cooling (50 ml/min mini).
- Max force: 0,5-1N = 50-100 grs
- Max speed: 10,000 t/min

Description	Package Contains	Order Number
Turbine FG	5	ECM1032
Contra-angle CA	5	ECM1042

Spherical Bur 0.21

- Permits the removal of excess composite with a minimum risk to the enamel. air-jet or spray cooling (50 ml/min. mini).
- Max force: 0,5-1N = 50-100 grs
- Max speed: 5,000 t/min

Description	Package Contains	Order Number
Contra-angle CA	5	ECM1043

Bur 0.12

- Permits the cleaning of inter-proximal sites with minimum risk to the enamel. air-jet or spray cooling (50 ml/min. mini).
- Max force: 0,5-1N = 50-100 grs
- Max speed: 10,000 t/min

Description	Package Contains	Order Number
Turbine FG	5	ECM1039
Contra-angle CA	5	ECM1044

Burr 0.23

- Burr provides a high lustre to the enamel surface. Shape adapts to the buccal and lingual surfaces without risk of abrasion to the surrounding tissue
- For use at slow speed and with light pressure. Air-jet cooled
- Max force 0.5-0.5N = 20-50 grs
- Max speed 5,000 t/min

Description	Package Contains	Order Number
Turbine FG	5	ECM1035
Contra-angle CA	5	ECM1045

Bur 0.12

- Bur designed for polishing difficult to reach areas.
- Air-jet and spray cooling (50 ml/min).
- Max force: 0,5-1N = 50-100 grs
- Max speed: 10,000 t/min

Description	Package Contains	Order Number
Turbine FG	5	ECM1036
Contra-angle CA	5	ECM1046

Polishing Bur 0.30

- 0.7 mm height. Can be used with polishing paste.
- Low pressure 20,000 t/min

Description	Package Contains	Order Number
Turbine FG	5	ECM1037
Contra-angle CA	5	ECM1047

WIRES

Wires are a key component of any fixed appliance treatment. Recent metallurgic advances have created many options for today's orthodontists. RMO® is proud to have the most complete wire selection available in the market.

Key characteristics of wire to consider are: strength, stiffness (or its inverse – springiness), range, resilience and formability. Each wire has a unique set of properties, and the orthodontist selects the best option for their patient and treatment philosophy.

CONTENTS

RMO®'s products are made to inch specifications and are not perfectly interchangeable with products made to metric measurements. The attached tables may be used when product measurement conversions are needed. The figures have been rounded to useable form. It should be noted that when converting from measurements already expressed in millimeters (such as manufacturer's specifications) to inches, a discrepancy due to rounding may occur.

Common Fractions of an Inch and Decimals to mm

NiTi (Nickel-Titanium)

NiTi wires were introduced as orthodontic wires due to their unique properties of shape memory and maintaining a constant force over a range of wire deflections to move teeth. RMO® offers many options for wires having low, medium, and high tooth-moving forces. The wire lines were designed with Thermalloy® having the lowest forces with a true heat-activation characteristic in the mouth. Thermalloy® Plus delivers medium forces, while still offering the feel of a thermal-activated wire. Orthonol® delivers high forces and has super elastic properties. Orthonol® has

been used to offer additional arch forms in the Ricketts® Penta-morphic shapes. Wires have been designed and manufactured in a logical and consistent way. In each wire line, a larger wire delivers a greater force. Among wire lines, for the same size wire (for example, 0.16" round or .017" x .025" rectangular), Thermalloy® delivers the lowest force; Thermalloy® Plus delivers a moderate force; and Orthonol® delivers the largest force. This gives the doctor a large number of options in selecting the type and size wire that is right for his/her practice.

Orthonol® Superelastic Nickel-Titanium

- Nickel-titanium alloys are shape memory alloys
- Orthonol® is superelastic nickel-titanium in preformed natural arch shapes
- Provides an ideal continuous gentle force at a constant, uninterrupted force level for tooth movement
- Reduces chair time by extending time between visits
- Permanent midline etchmarks: Three lines for a maxillary arch, one line for a mandibular arch

Pre-Torqued Preformed Arches

- Provides the addition of torque into the anterior region while maintaining non-torque in the posterior region
- Nickel-titanium alloys are shape memory alloys
- Provides 20° anterior torque. Three anterior torque lengths available: 28, 34 and 38mm
- Labial or lingual torque forces available by flipping wire orientation

Reverse Vector Arches

- Increases efficiency in closing anterior open bites and correcting excessive overbites
- Employs curve of spee to eliminate the need for step downs, step ups and other varieties of activating loops to correct overbites
- Leveling by extrusion (relative intrusion) can now be accomplished by one continuous reverse vector
- Minimizes molar rotation
- Controls incisor torque
- Permanent midline etchmarks: three lines for maxillary, one line for mandibular arch

Penta-Morphic® Arches (Ricketts®)

- Finishing arches for post-treatment provide long-term stability
- Five arch forms: normal, tapered, ovoid, narrow tapered and narrow ovoid
- Tooth size, facial type, and other morphological considerations have been built into the five forms
- Distal length for individualized bends or continuation to second molar
- Maxillary or mandibular
- Orthonol (nickel-titanium) "dimpled" midline

Thermaloy® (Thermal Activated Nickel-Titanium) Plus

- Some thermal properties at room temperature; superelastic in the mouth
- For clinicians who want a higher force in a small round wire than a true thermal activated wire
- Forces intermediate between Thermaloy and Orthonal
- Easier insertion than a superelastic wire
- Forces delivered to teeth that compare to other intermediate force brands
- Bulk and convenient single wire packaging ten wires to a box
- Permanent midline etchmarks: three lines for maxillary arch, one line for mandibular arch

Thermaloy® (Thermal Activated Nickel-Titanium)

- Pliable at room temperature and superelastic at body temperature
- Can be used as an initial arch wire for treatment
- Same elastic working range as superelastic with lower forces
- Can be used earlier in treatment to provide tongue control
- Easier to ligate in severely maligned cases and impacted canines
- Increases patient comfort
- Permanent midline etchmarks: three lines for a maxillary arch, one line for a mandibular arch
- Bulk and convenient single wire packaging ten wires to a box

FLI® Copper Nickel-Titanium Wire Overview

FLI Copper Nickel-Titanium is the newest addition to RMO®'s extensive line of archwires providing flexible treatment options with a wide selection of forces and wire sizes. The addition of copper to nickel-titanium alloy enhances the thermal properties of the wire while maintaining precise control of forces. Enhanced resistance to permanent deformation and smooth progression of transformation temperatures yielding an expected feel in hand makes FLI Copper Nickel-Titanium the ideal treatment solution for any office. Materials: Copper Nickel-Titanium, 49.1% Ni, 44.5% Ti, 6% Cu, Balance Cr (nominal composition). Transformation Temperatures: 27°C Highest Force Levels, 35°C Medium Force Levels, 40°C Lower Force Levels.

FLI® Wire Orthonol® Nickel-Titanium Preformed Natural Aesthetic Coated Arch Wires

- Natural appearance that will last until your next wire change
- Maintains expected wire properties and performance characteristics of the wire
- Coating on labial surface only
- Nickel-titanium alloys are shape memory alloys
- Orthonol® is superelastic nickel-titanium in preformed natural arch shapes
- Provides an ideal continuous gentle force at a constant, uninterrupted force level for tooth movement
- Reduces chair time by extending time between visits

Bendaloy® Titanium - Molybdenum Based Alloy Preformed Natural Arches

- Bendaloy® is a nickel-free material that is ideally suited for patients with high sensitivity or reactions to nickel content
- Large springback provides better control over tooth movement
- Minimizes adjustment intervals
- With less stiffness than stainless steel, it allows wires to fill the bracket for control with lighter forces
- Is formable and capable of being formed into complicated configurations without fracture
- Permanent midline etchmarks: three lines for a maxillary arch, one line for a mandibular arch
- Bendaloy® Round is ideal for alignment, rotations, retractions and finishing
- Bendaloy® Rectangle is ideal for torquing, rotations, retractions and finishing

TRU-CHROME® Development

Wire has been basic to orthodontics since its beginning. By serving as holding, anchoring and spring elements, the orthodontist is able to stimulate tooth movement predictably and precisely.

In developing specialty wires for modern orthodontics, several considerations are involved:

- Semantic problem of matching requirements and terminology of orthodontics with engineering terms and tests.
- Selecting the best alloys, tempers, sizes, etc.
- Engineering procedures and quality controls for accuracy and dependability.
- Refinement of time-saving instruments, equipment and handling techniques to assure best results.

In the selection here, you will find the most complete choice of controlled quality wire for all techniques.

The success of chrome alloy stainless steel in orthodontics lies in the keen combination of delicacy and strength. It possesses, to an unusual degree, those three requisites of an orthodontic metal—hardness, elastic limit and tensile strength.

TRU-CHROME® Stainless Steel Wire

TRU-CHROME® stainless steel wire is a stable, consistent, predictable performance wire, offered in four tempers. Quality controls are the tightest of any stainless steel wire in the industry.

Resilient Arch Wire Temper

Resilient arch wire temper is available in preformed arch blanks and is used in some special wire forms, depending on the suitability for the desired usage. Straight lengths are provided for those who prefer forming their own arch wires.

Retainer Wire or No. 2 Temper

Retainer wire or No. 2 temper stainless steel wire has a softer temper than arch wire temper, which enables the operator to more easily form the wire into retainer appliances. Forming the wire work-hardens it and provides a working resiliency for retainer appliances.

Clasp Wire Temper

Clasp wire is a stainless steel wire between the resilient arch wire temper and the retainer wire temper. It is soft enough to be instrument-formed to the clasp configuration and, in forming, gains sufficient hardening from pliering to have a satisfactory spring resiliency for clasps.

Ligature Wire Temper

Ligature Wire is a stainless steel wire of “dead-soft” temper that allows ligating and tying to be done with minimal work-hardening of the wire.

Stainless Steel Wire Properties

TRU-CHROME®

TRI-FLEX Twisted Wire

Tri-Flex (3 strands) is spring-tempered, twisted leveling wire for early treatment stages. It bends readily and can accept great deflection before its limit is reached. It provides gentle force and will not unravel or fray when cut.

Inch	Size (mm)	Package Contains	Order Number
ROUND (14" (35.56cm) STRAIGHT LENGTHS)			
.0155	(0.394)	10	E00175
.0175	(0.445)	10	E00176
.0195	(0.495)	10	E00177
.0215	(0.546)	10	E00178

SUPRA-FLEX™ Twisted Wire

Supra-Flex (6 strands) is cable-designed, initial stage arch wire with five exterior wires helically wound around a core wire. It can be flexed to a great degree without taking a set. It delivers constant uniform light force over a long period of time and does not fray when cut.

Inch	Size (mm)	Package Contains	Order Number

Elgiloy® Wire

Elgiloy® wire is a premium, specially-fabricated wire in four tempers. Each Elgiloy® wire type has separate characteristics. Wire forms made from Elgiloy® can be heat-treated, depending on the desired application. It's toughness and flexibility are easily discernible with use. Elgiloy® wire is superior, as furnished, for forming, and in performance time during treatment. All tempers have the unique capability of beginning as a "softer" easily handled wire. Because Elgiloy® wire can be used as is or heat-treated, it provides flexibility and control in force applications.

Elgiloy® Development

RMO® was selected to develop Elgiloy® for orthodontics because of its leadership in developing new materials for the profession. This "wonder metal", developed by the Elgin National Company as the "Heart That Never Breaks" in modern precision time pieces, is not a stainless steel. It is a patented cobalt-base alloy compounded of eight materials (cobalt 40%; chromium 20%; nickel 15%; molybdenum 7%; manganese 2%; beryllium .04%; carbon .15%; and iron 15.81%).

Elgiloy® Offers Orthodontists Particular Advantages

- Superior physical properties
- Longer functioning as a resilient spring wire without distortion or fatigue
- Easy soldering without annealing
- Easy heat-treating to increase physical properties
- Simple electrolyte polishing

Maximum properties are not necessarily best for all orthodontic purposes. Full spring qualities are excellent for small diameter arch wires and coil springs, but larger wires of full spring temper are impossible to handle. It follows that the best qualities for a particular alloy form vary according to the work to be done to the material and the final usage. Recognizing this, RMO® developed a series of different types of Elgiloy® wires—each fabricated for specific applications and each identified by a color marking on the end.

With a wide range of carefully engineered wire types, orthodontists can take full advantage of Elgiloy®'s superiority and versatility, whatever their techniques.

Elgiloy® Wire Properties

- **Set resistance** – Retains power longer than stainless steel
- **Fatigue resistance** – More cycles than stainless steel without breakage
- **Greater spring efficiency** – Up to 20% more power than spring steel without an increase in dimensions
- **Corrosion resistance** – Outperforms chrome stainless steel by 17%
- **Non-magnetic** – Non-magnetic through all temperature ranges

How to Use Elgiloy®

- **Blue** – Blue Elgiloy® is initially the softest of the tempers. It can be welded with low heat, and soldered without embrittling. Blue Elgiloy® is recommended when the wire to be used is over .020" (0.508mm) or when the wire requires considerable bending, welding or soldering. Excellent for edgewise arches, lingual arches, retainers and removables.
- **Yellow** – Yellow Elgiloy® is initially ductile and slightly harder than Blue Elgiloy®. Using caution, you can spot-weld and solder to large Yellow Elgiloy wires, .021" x .025"; .030"; .036" (0.533mm x 0.635mm; 0.762mm; 0.914mm), without embrittling them. Some practitioners use Yellow as furnished, but it can be heat-treated if greater resiliency or spring performance is required. After heat-treating, Yellow Elgiloy® can be adjusted slightly, but should not sharply. It is excellent for flat wire techniques. Yellow Elgiloy® is recommended where greater spring qualities are needed than those provided by Blue Elgiloy®.
- **Green** – Green Elgiloy® is initially semi-resilient and will temper comparable to high spring tempered steel wires. It can be shaped easily with the fingers and can be plier-manipulated before heat-treating.
- **Red** – Red Elgiloy® is initially "hard" with exceptionally high spring qualities. It is not recommended for heat-treating. Use where adjustments will not be required after heat-treating.

Elgiloy® Preformed Arches

- Maxillary and mandibular arches are distinguished by permanent midline etchmarks: three lines for a maxillary arch, one line for a mandibular arch
- Elgiloy® arches are delivered unheat-treated, allowing complex bends and loops to be easily made. After bending, Elgiloy® arches can be heat-treated to increase their springiness

Penta-Morphic® Arches (Ricketts®)

- Finishing arches for post-treatment provide long-term stability
- Five arch forms: normal, tapered, ovoid, narrow tapered and narrow ovoid
- Tooth size, facial type, and other morphological considerations have been built into the five forms
- Distal length for individualized bends or continuation to second molar
- Yellow Elgiloy® Penta-Morphic arches are heat-treated to maintain form and resiliency

ELGILOY®

Gummetal® Preformed Arches

GUMMETAL®

Gummetal® was developed at Toyota Central R&D Lab in Japan with properties close to rubber: a perfect balance between flexibility and stiffness.

Nickel free titanium alloy made of Titanium (Ti), Niobium (Nb), Tantalum (Ta) and Zirconium (Zr).

Gummetal® has a large elastic deformation range with good formability and a very low Young's Modulus (soft) with enough stiffness.

Gummetal® wire (square/rectangular) can be used to give torque control at the earlier stage in treatment because of its high flexibility. Full size wire can be used to achieve the active torque control because of its moderate stiffness and optimum recovering ability. Maximum activation of the wire is available because of its very wide elastic deformation range.

Because of Gummetal®'s excellent bend capabilities it substantively eliminates the necessity of wire changes after leveling. Because of Gummetal's ultra-low young's modulus the complicated wire bending is no longer necessary. Because of Gummetal®'s high flexibility and formability is advantageous to use with smaller inter-bracket distance such as in lingual technics.

Thermal Nickel-Titanium Arch Preformed Natural Arch

- Thermal wire with excellent shape memory generates light, constant and prolonged forces
- Use as an initial arch wire for unscrambling and alignment is easier to ligate in severely misaligned cases
- Pliable at room temperature and superelastic at body temperature
- Permanent midline etchmarks: three lines for a maxillary arch, one line for a mandibular arch

Inch	Size (mm)	Package Contains	Maxillary	Mandibular

TRIO FORCE

Australian Wires

For over fifty years, A. J. Wilcock® Australian Wire has been a household name in orthodontics. The extraordinary properties of these wires are due to the research and fine engineering skills employed in the processing of the wires. Wilcock wires are well known for their resilience and ability to withstand masticatory forces as well as being able to maintain their shape even when auxiliaries and elastics are used. There is no other wire which opens the bite as effectively as Wilcock wire. Although these wires have been imitated by many manufacturers over the years, A. J. Wilcock Scientific & Engineering remains the global market leader in high tensile stainless steel archwires.

Regular and **Regular Plus** are easily formed and are excellent wires for general use and utility wires.

Special, **Special Plus** and **Premium wires** are ideal for bite opening and where high resilience is required.

The finer wires such as **Premium Plus** and **Supreme** are ideal for auxiliaries

Penta-Morphic® Arch Selector

- 8" x 10" Vinylite

Package Contains	Order Number
1	i00509

Arch Forming Template

- Ideal for arch forming adjustments and horizontality control
- Black hard 8 mm thick altuglasss plaque
- Dimensions: 204 mm x 128 mm
- Side 1: reproduce 5 pentamorphic Ricketts arch forms
- Side 2: for arch flatness control

Package Contains	Order Number
1	ECi0508

Preformed Auxiliary Ligature Tie Hooks (Kobayashi type)

- Stainless steel
- Quickly and easily tied in place without removing arch wire
- Spot welded to form hook
- Slipped under tie wing and tied
- Hooks adapt to up/down usage

Anterior Torquing Spring (Warren)

- Applies continuous torquing action to individual anterior teeth
- Spring slips on arch wire straddling the bracket on the anterior tooth to be moved
- Placement of the arch wire in the bracket activates the spring, providing single contact with the tooth surface
- Each size is designed for a specific wire dimension and will not grip other dimensional wire sizes or round wire
- Green Elgiloy® heat-treated

Tiger Dental

Piggy Back Spring

The Piggy Back Spring is a clampable pressure spring element, which is inserted safe and easy. In the levelling phase, pressure on the crowded teeth is often already required. In spite of brackets, the piggy back spring can be mounted here in seconds without removing the treatment arch. Just squeeze the hooks and the job is done. This makes possible simultaneous use of brackets in the crowded area. Six different lengths allow space to be gained from a single tooth area to eye tooth to eye tooth distance. The individual sizes are arranged in different colours. With full compression approximately 200 cN force expansion (progressively reducing). Spring is in elgiloy alloy and the hooks are stainless steel.

Cool Spray for Archwires

- 200ml
- Up to -45°C
- To cool thermal archwires (Thermaloy,...)

Package contains	Order Number
1	ECM8124

Archwire Rack

- Transparent Plexiglass with White Base
- Stores up to 10 preformed arches of different sizes and 8 tubes of straight wire
- Dimensions: 168 mm long x 108 wide and height

Package contains	Order Number
1	ECJ0440

Disposable Arch Markers

- Arch marker indicates set-backs, loops, spring position

Description	Package Contains	Order Number
Arch Marker Dispenser	1	ECM1220
Refill - Red markers	100	ECM1221
Refill - White markers	100	ECM1222

Arch Marking Crayons

- Wire marking crayon indicates set-back, loops, spring positions, etc.
- Water-soluble wax
- High visibility and super adhesion

Arch Wire Dispenser System

- Dispenser unit designed to store both RMO® PurePak® and standard arch wire packages for clear identification and simple storage solutions
- Dispenser can be placed on a flat surface or conveniently wall mounted for easy access

Package Contains	Order Number
1 dispenser	J00610

11

INSTRUMENTS

RMO® has always been attentive to its customers and has developed its product range according to orthodontic clinic needs.

It is the same for our instrument range. Known and recognized by the profession for its manufacturing quality, its precision in usage and its high resistance to weariness and corrosion.

The RMO® pliers have become a standard in the profession. Doctors use the RMO® part number to name the pliers. For example 442 for a torquing plier is the RMO® i0442, or the 139 or a bird beak plier is the original i0139 from RMO®...

In order to match customer satisfaction to quality of products, RMO® Europe has developed two ranges of pliers. All part numbers starting by i, ECi or ECM are pliers/instruments made in Europe. The ones starting by T are made in the USA. This complete range will allow you to find the ideal solution to your working habits.

CONTENTS

- 256** Band Instruments
- 259** Bracket Instruments
- 261** Ligation Pliers
- 265** Wire Bending Pliers
- 272** Utility Pliers
- 273** Cutters
- 276** Stripping
- 278** Specialized Instruments
- 280** Measurement Instruments & Accessories

What makes instruments from RMO® the better choice?

Superior quality maximizes satisfaction of our users.

Compared to other equipment used by dentists and labs, hand instruments represent a relatively small investment and can be used for many years. In this environment, a top quality instrument offers two unbeatable advantages for its user:

- Top quality instruments make the daily work more satisfying. That's because they allow for a more precise and ergonomic work process—which leads to better work results day to day over years and years.
- Top quality instruments are the more economic choice despite the higher price. The higher up front investment pays out two-fold: 1: Top quality instruments enable their users to achieve the same work result in less time (which reduces labor cost) or a better work result in the same time (which increases customer satisfaction and, thus, turnover); 2: Top quality instruments last longer and therefore minimize investments for replacement and repair.

Especially for inserted pliers, fulfilling all of the above mentioned requirements demands great care and expertise. Why?

Certain treatments of hard wires such as cutting and sharp bending of arch wires, specifically stress the working ends of orthodontic pliers.

Therefore, these working ends need to be equipped with hard inserts to ensure perfect function and prevent them from being damaged by the wire. These inserts are applied to the plier via soldering.

The challenge is to develop a combination of insert material and soldering technique that:

- Offer a high and even hardness of the insert to the plier (to ensure perfect wire handling over a long time).
- Guarantee a secure fixing of the insert to the plier (to prevent it from falling off during use)
- Allow for standard cleaning and sterilization procedures (to make instrument care easier)
- Has a high corrosion resistance (to ensure a long lifetime).

Our pliers offer some significant advantages for their users. Some of them are already visible on the new, unused plier. Others only become obvious when using the pliers over time.

For an orthodontic plier this means:

1. Precise, long lasting working ends for perfect holding, bending and cutting results.
2. Precise, long lasting plier lock for perfect guidance of working ends without jam and/or wobble.
3. High corrosion resistance.
4. All standard cleaning and sterilization procedures applicable.

Our insert alloy combines hardness (around 62 HRC) with a high corrosion resistance. Therefore our pliers do not need to be chrome plated.

Consequently, except for chrome plated instruments, our pliers can be subject to ultrasonic cleaning and disinfection with appropriate liquids as well as autoclave sterilization.

Our beaks and inserts are milled on high precision machines and additionally get final adjustment by expert craftsmen with long experience.

Our locks are produced with great care to ensure a smooth and precise action over the whole working angle.

That's because precision of lock determines precision of plier. If the lock is not tight enough, the plier will not allow for precise work because the working ends will not close as precisely as they are supposed to.

All edges of our pliers are carefully chamfered to increase safety of patient and doctor (no pinching or wounding of gums).

For less stressing wire treatments such as ligature wires, bands, elastics and light wires, orthodontic pliers do not need inserts.

Therefore, we protect those pliers with a tungsten carbide coating and we are the only ones who do it. Apart from the coating of the beaks, our non-inserted pliers are produced with the same great care on beak form, locks and edge chamfering as our inserted pliers.

Warranty and Recommendation for Care and Maintenance for RMO® instruments

RMO® has been the leader for over 70 years in providing the orthodontic market worldwide with the highest quality products and services.

RMO® instruments are made 100% in Germany with selected high-grade raw materials and by expert craftsmen providing high quality and precision to ensure routine orthodontic procedures are more efficient for you and your staff. Our promise to you is your investment in these superior instruments will provide reliable service for many years.

Warranty

- All RMO® Instruments are fully guaranteed against corrosion and separation of cutting inserts from the instruments for 5 years from the purchase date. (All RMO/ Ascent Instruments carry a one year warranty on corrosion resistance and manufacturing defects.)
- All RMO® Instruments are fully guaranteed for the life of the instrument to be free of defects in materials and workmanship.
- All RMO® Instruments, if misuse, abuse or failure to properly maintain or care for the instruments will void all above warranty claims
- All RMO® Instruments, which are unused, unopened and in the original package maybe returned for full credit of the purchased price within 90 days of invoice.
- All RMO® Instruments, if defective, and not misused or tampered with in any manner, maybe return to RMO, Inc within the purchase period of 90 days for repair or at our option, replacement or refund of the purchase price.

For RMO® Instruments outside the warranty, call RMO® customer service or your sales representative with recommendation for repair. These Instruments are designed to provide long and faithful service. To protect your investment and ensure the reliable service for a long time, please follow the recommended maintenance and care. All new instruments should be brushed with soap and water, rinsed, dried and run through the entire sterilization process prior to use.

Disinfecting & Cleaning

All instruments should be disinfected and cleaned immediately after being used to remove debris, blood and to avoid drying of these contaminants on the surfaces of the pliers.

- Chemical Disinfection, if this method is the choice, we suggest using a quality Alkaline product (Rust Inhibitor). The solution needs to be prepared every day exactly in the same concentration. Make sure to dip the instrument into the solution only after complete dissolution of the concentrated chemical. Scrub the instrument tips with plastic brush if necessary. Don't soak the instrument for an extended period of time. The solution's temperature should not exceed 25°C (78°F).

- Ultrasonic Cleaning Device. Please use a high quality nonaggressive ultrasonic solution with rust inhibitors and PH neutral. Extended cleaning time with acidic chemicals will destroy your valuable instruments very quickly.
- Rinse the instruments with Water (the use of distilled or deionized water will provide further protection against rust and discoloration) immediately after disinfection and cleaning using methods above dry them carefully with towel or compressed air to avoid water staining. If these steps are not followed properly, the instruments may be subject to corrosion or discoloration in the sterilizer.

Sterilization

Sterilize the instrument in an open position. Follow the instructions of the manufacturer of the units. Make sure that no moisture is sealed in the bag.

- Autoclave Sterilization: Recommended to extend the lifetime of the instrument.
- Cold Sterilization: refer to instructions of the Disinfection and Cleaning section.

Band Adapter (RMO®)

- Durable plastic bite block and RMO® tempered stainless steel band seating pin
- For bite or hand rocking bands
- White plastic handle
- Serrated pin
- Replacement bite block (can be installed at chairside)
- Cold sterilize

Description	Package Contains	Order Number
Band adapter (RMO®)	1	i00064
Replacement bite block	2	i00065

Bitable Band Setter

- Plastic handle
- Triangular tip in hardened steel
- Cold or autoclavable sterilisation

Package Contains	Order Number
1	ECi0010

Band Setter (Mershon)

- Stainless steel tip with straight grooves
- One piece made for ultra sonic cleaning
- Hexagonal stainless steel handle with rounded end

Package Contains	Order Number
1	i00303

Band Seaters (RMO®)

- Spring actuated thrust insures proper band seating
- Plastic handle with stainless steel barrel and tempered steel removable tip

Description	Package Contains	Order Number
With offset tip	1	i00580
Replacement offset tip for i00580	1	i00581
Replacement spring for i00580	1	i00582
With straight tip	1	i00600
Replacement straight tip for i00600	1	i00601
With narrow straight tip (Gaston)	1	i00610
Replacement narrow straight tip for i00610	1	i00611

Ergonomic Band Pusher

- Ergonomic stability by design with aluminium handle offset by SS head. The unremovable connexion makes the system stable and stiff
- Removable, autoclavable soft cap protects the tooth. Autoclavable up to 134°C / 273°F For cold sterilization. Easy assembled / disassembled with a click

Description	Package Contains	Order Number
Band Pusher	1	ECi0876
Rubber cap	2	ECi0876-E

Contouring Plier (Gordon)

- For bands & anterior stainless steel crowns
- Stainless steel
- Box joint

Package Contains	Order Number
1	i00137

Contouring Plier (Johnson)

- Concave and convex tips for contouring bands
- Stainless steel

Package Contains	Order Number
1	i00114

Band Cisors

- Made to cut metal: bands & ligature twists

Description	Package Contains	Order Number
Straight tips	1	i00024
Curved tips	1	i00025

Posterior Band Removing Plier

- Long chisel tip with carbide insert
- Occlusal nylon pads are replaceable
- Nested or adjustable axle

Description	Package Contains	Order Number
Nested axle and standard handle	1	i00347
Nested axle and long handle for 2nd molars	1	i00348
Adjustable axle and standard handle	1	ECi0547
Replacement Pads	10	i00357

Posterior Band Removing Plier

- Stainless Steel
- Hard inserts
- Insert alloy combines hardness with a high corrosion resistance

Description	Package Contains	Order Number
Plier	1	iA0347
Replacement Pad to insert for iA0347	10	iA0347-i
Replacement Pads to screw for iA0347	10	iA0347-V
Plier	1	T00347
Tips for T00347	3	T00347T

Utility Scaling, Ligature Remover and Band Seating Instrument (Schure)

- Precision knurled handle
- Sharp scaling shape on one end and serrated band seating tip on the other
- Heat-treated tips maintain sharp edge for extended use

Description	Package Contains	Order Number
Standard	1	i00349
Thin tips	1	ECi0349

Band Pusher/Scaler (Guequierre)

- Dual scaling surface
- One end has sharp curved scaling head with serrated tip on the other

Package Contains	Order Number
1	i00358

Universal Height Gage Tweezer

The first tweezer including a height gage specially made for SL brackets. Two tips hold the bracket into the wire slot for both .018 and .022 slots. The measure is precise from top to wire slot.

Available in 3.5mm, 4mm, 4.5mm and 5mm

Package Contains	Order Number
1	ECi0412

Direct Bond Bracket Holder

Description	Package Contains	Order Number
Grooved tips	1	i00411
Curved tips for lateral or lingual bonds	1	i00412
Reversed tweezer: Pressure releases the tips	1	ECi0414
Small	1	T00102

Tweezers for Little Lingual Brackets or Attachments

- Reversed tweezer: Pressure releases the tips
- The thin tips will fit between base and wings of a bracket

Description	Package Contains	Order Number
Version for brackets	1	ECi0221
Version for lingual retainer	1	i01102

i-TTR Utility Tweezer

- Stainless Steel
- Thin tapered tips are serrated for additional grip
- Excellent general use utility tweezer
- Recommended for use with the RMO® i-TTR Lingual Bracket System

Package Contains	Order Number
1	ECi0452

Reverse Action Tweezer

- For lateral and posterior sectors

Package Contains	Order Number
1	ECi0020

Direct Bond Removing Pliers

Description	Package Contains	Order Number
Hard tool steel insert		
▪ Narrow (2,2 mm)	1	i00545
▪ Wide (3,2 mm)	1	i00546
Thin tips	1	T00546
Angled for lateral and posterior sectors	1	i00576
Angled	1	T00545
With occlusal nylon tip	1	i00579
Replacement pads	10	ECi5791

Direct Bond Remover - Angled

- Angled for lateral and posterior sectors

Package Contains	Order Number
1	ECi0564

Ligature Tying Plier (Coon)

- Semi-automatic
- Locking channel is chamfered and burr-free to allow wire to slide before locking without being cut

Description	Package Contains	Order Number
Coon Model	1	i00153

Module Placing Plier

- For initial placing of force modules
- Ideal for placing ligatures and separators
- Easy access to difficult areas (posterior)
- Reduces module breakage
- Patient safe, easy spring-back action

Description	Unité de Vente	Référence
Module placing plier 1	1	i00810
Module placing plier 2	1	T00810

Ligature Tucker and Tier (Twirl-On)

- Ingenious, practical, rapid. The module is pre-stretched for insertion and is freed by pivoting the instrument (90°)
- The use of several instruments permits ligatures to be prepared in advance
- Dual sided model

Package Contains	Order Number
1	ECi0277

Mosquito Hemostat

- 4.75" (12cm) long
- With locking handle
- Serrated tips for positive gripping

Description	Package Contains	Order Number
Regular	1	ECi0124
Curved	1	ECi0125

Needle Holder Small Narrow Tip (Mathieu)

- Precision made ligating instrument tips-safe beaks
- With ratchet lock handle
- Tips are serrated for positive gripping of ligature wires and modules
- Hook tip style for easy placement of elastic modules and gripping

Package
Contains

ECiL0028

Metal Ligature Shaping Plier

- Can make up to 50 ligatures at a time
- Shape a 5mm buckle with any ligature wire up to .014"

Package Contains	Order Number
1	i00158

Ligature Tucker and Tier (Broussard™)

- Stainless steel
- One end twists steel ligature into a tie
- The other tucks twisted wire

Package Contains	Order Number
1	i00274

Ligature Tucker

- Straight notched tip at one end for anterior brackets
- Angled notched tip at other end for posterior brackets
- Chamfered slots avoid breakage of ligature wires
- Tips are smoothed to avoid hurting tissue

Package Contains	Order Number
1	i00273

Ligature Tucker

- Straight notched tip at one end for anterior brackets
- Angled notched tip at other end for posterior brackets

Description	Package Contains	Order Number
Small notch 0,6 mm	1	ECM0869
Round handle, Narrow notch	1	ECi0279
Large notch 1,0 mm	1	ECM0870

Ligature Tucker - Silicon Handle

- Straight notched tip at one end
- Angled notched tip at other

Package Contains	Order Number
1	ECi0050

Ligature Tucker & Scaler - Silicon Handle

- Straight notched tip at one end
- Scaler at other

Package Contains	Order Number
1	ECi0051

Ring Tie Placer - Silicon Handle

- Thin tip to easily remove elastomeric rings

Package Contains	Order Number
1	ECi0052

Lingual Ring Tie Placer - Silicon Handle

Package Contains	Order Number
1	ECi0876

3 Instruments Kit - Silicon Handle

- Contains ECi0050, ECi0051 & ECi0052

Package Contains	Order Number

T00701

Loop Plier (Tweed)

- Tips precision milled
- Three step loop former: .049" (1.25mm), .063" (1.65mm), .085" (2.15mm)
- Grooved and serrated opposing tip for very small loops
- For up to .022" x .028" (0.559mm x 0.711mm) wire
- Non-removable tip

Package Contains	Order Number
1	i00350

Loop Pliers (Tweed)

- Includes one extra replacement tip
- It has three sections of .047" (1,2 mm) .063" (1,6 mm) and .080" (2 mm) or two sections depending of models
- Concave beak prevents wire nicking and ensures more uniform loops; for making Omega loops
- For up to .020" (0.508mm) wire

i00548

Description	Package Contains	Order Number
Triple tips model	1	ECi0541
Replacement tips for ECi0541	2	ECi5410

T00350

T00350T

Loop Forming Plier (Jarabak)

- Ideal for precise bending of lighter wires.
- Precision groves ensure accurate bending and closing of loops. Designed with tips.
- Wires up to .20" (0,5mm)

Package Contains	Order Number
1	i00530

Loop Forming Pliers (Optical Type)

- Cone and concave beaks for round wires
- Concave beak is contoured for more uniform loops
- Round beak is precision ground to .047" at tip

Description	Package Contains	Order Number
For up to .032" (0.508mm) round wires	1	i00351
For up to .".022" x .028" rectangular wires	1	T00351

Stop/V-Bend Plier

- Special design makes 1mm "V" bends to shorten arch wires or provide a positive stop
- Excellent for placing stops in Nickel Titanium wires
- Box joint

Package Contains	Order Number
1	T00221

Arch Forming Plier (Young)

- Round beak on flat beak, for loop forming round wires (Quad-helix, Hawley, ...)
- Three grooves of different sizes are used to fold wires of .030" and of .036" for insertion in a lingual sheath

Package Contains	Order Number
1	ECi0074

Hawley Loop Forming Plier

- Round beak on flat beak, for Hawley loop forming

Package Contains	Order Number
1	ECi0966

Lingual Arch Forming Pliers

- Designed to form double back and triple back bend in either .030" (0.762mm) or .036" (0.914mm) wire for inserting in lingual sheaths
- Double back groove is close to the plier joint to assure adequate forming
- Recommended for use with 3D® FIXED/REMOVABLE™ (Wilson®) for palatal activation appliances

Description	Package Contains	Order Number
Plier 1	1	i00420
Plier 2	1	T00420

Three Jaw Clasp Adjusting Pliers (Aderer Type)

- Tips for rounded or dimensional wire up to .045" (1.016mm)
- Exact shape and position of beaks will avoid squeezing and marking of wire

Description	Package Contains	Order Number
Wire up to .045"	1	ECi0203
Wire up to .040"	1	i00200
Precision tips • .018" - .032" (0.457mm - 0.813mm) Round • .022" x .028" (0.559mm x 0.711mm) Rectangular	1	T00201
Wire up to .030"	1	i00201
Wire up to .028"	1	ECi5130
Wire up to .016" (thin tips) (recommended for NiTi wires)	1	ECi0843
Wire up to .028" (thin tips) (recommended for NiTi wires)	1	i00035
TTR plier	1	ECi0451
Up to .028" wire	1	ECi0845

Three Jaw Clasp for Facebows

- Extra hard stainless steel prevents wire damage

Package Contains	Order Number
1	i00100

Wire Contouring Plier

- Smooth, non-grooved surface with chamfered forming surfaces for stress free bending
- Box joint
- .016" - .036" (0.406mm - 0.914mm) Round
- .022" x .028" (0.559mm x 0.711mm) Rectangular

Package Contains	Order Number
1	T00204

Arch Forming Template

- Ideal for arch forming adjustments and horizontality control
- Black hard 8 mm thick altuglasss plaque
- Dimensions: 204 mm x 128 mm
- Side 1: reproduce 5 pentamorphic Ricketts arch forms
- Side 2: for arch flatness control

Package Contains	Order Number
1	ECi0508

Waldsachs Plier

- Suitable for forming of heavy wires, cuts wire up to .028"
- Ideal for laboratory use

Closing Loop Pliers

- Extra hard stainless steel
- For up to .022" x .028" wire and round up to .020"
- Radiused edges prevent wire damage

Description	Package Contains	Order Number
Permits 5 uniform vertical bendings (3, 4, 5, 6 & 7mm)	1	i00101
Forms precision loop with four-step tip (3, 4, 5 and 6mm)	1	T00001

Tie Back Plier (Nance)

- Forms stop and tie back loops on rectangular arch wire size only for .022 x .028 (0.558 x 0.711mm)
- Extra hard stainless steel

Package Contains	Order Number
1	i00002

Arch Forming Pliers (Angle)

- For bending, holding or torquing dimensional wires

Description	Package Contains	Order Number
Thin jaws are parallel at .020" opening • Plier 1	1	i00442
Thin jaws are parallel at .020" opening • Plier 2	1	T00442
Thin tips (1,3 mm)	1	ECi0443
Adjustable lock - w/o tungsteme / Thin tips (1.4 mm)	1	ECi0542

Cinch Back Plier

- This plier is made with the optimum angle for working behind the buccal tube
- Serrated tips are tapered to a fine point allowing access to hard-to-reach areas
- Box joint
- .014" - .020" (0.356mm - 0.508mm) Round
- .022" x .025" (0.559mm x 0.635mm) Rectangular

Torquing key designed for 4 arch thicknesses .016" .017" .018" .021"	1	ECi0874

How Pliers

- Extra hard stainless steel
- Good all around utility plier has long slender lip-safe beaks
- Tips are serrated and hard carbide coated for additional grip
- Lip-safe edges at box and beaks
- Tips are precisely adjusted

Description	Package Contains	Order Number
Straight beaks 1	1	i00110
Straight beaks 2	1	T00110
Curved beaks 1	1	i00111
Curved beaks 2	1	T00111

Utility Pliers (Weingart Style)

- Stainless steel
- Tips are delicate and meet precisely so that even small attachments can be firmly held
- General purpose utility plier with curved beaks
- Inserted tempered tips for longer life
- Serrated and lip safe

Description	Package Contains	Order Number
Regular	1	i00556
Long chisel tip model	1	iA0556
Mini model	1	i00586
Fully serrated cross-cut inserted tip	1	T00556
Short lingual plier	1	ECiL0556

Flack Plier

- Multi purpose plier for laboratory use

Package Contains	Order Number
1	ECi5022

Crimp Plier

- Multi purpose plier with pointed beaks in extra hard stainless steel

Package Contains	Order Number
1	ECi5600

Distal End Cutters With Safety Hold

- Shear cuts hard wire and then safety holds the loose distal end to prevent wire from going into tissue
- Hard tool steel insert
- For up to .021 x .025 (0.534mm x 0.635mm) and .026 (.66mm) round wire
- Designed for intraoral cutting and lip safety
- Surgical stainless steel provides lasting beauty and durability

Description	Package Contains	Order Number
Regular • Plier 1	1	i00550
Regular • Plier 2	1	T00550
Small beak	1	i00554
Small beak and long handle	1	i00555
Cuts and holds arch wire within .5mm of the buccal tube • Long handle design allows better control behind second molars	1	T00554

Standard Flush Cut and Hold Distal End Cutter

- This unique design cuts wires flush with the buccal tube while holding fragments with a wire spring
- Box joint
- .012" - .020" (0.305mm - 0.508mm) Round
- .022" x .028" (0.559mm x 0.711mm) Rectangular

Package Contains	Order Number
1	T00566

Distal End Cutter (Thin)

- Hard inserts
- Insert alloy combines hardness with a high corrosion resistance
- All edges of the pliers are carefully chamfered to increase safety of patient and doctor

Package Contains	Order Number
1	IA0554

i00567

i00568

Flush Distal End Cutters with O-Ring

- Hardened insert
- Wire up to .022" x .028" (0.559mm x 0.711mm) and up to .026" (0.660mm) round
- O-ring ensures no direct contact, keeping a longer lasting sharpness

Description	Package Contains	Order Number
Short cutter	1	i00567
Long cutter	1	i00568
Replacement o-ring	10	ECi0570

i00553

T00553

Ligature and Hard Wire Cutters

- Stainless steel
- Cuts up to .022" x .028" (0.559mm x 0.711mm)
- Hard tool steel inserts

Description	Package Contains	Order Number
Stainless steel model	1	i00553
Black steel model	1	i00553S
Straight model	1	T00553
Angled model (15°)	1	T00553A

Hard Wire Cutter

- Hard inserts
- Insert alloy combines hardness with a high corrosion resistance
- All edges of the pliers are carefully chamfered to increase safety of patient and doctor

Package Contains	Order Number
1	iA0553

Heavy Wire Cutter

- Hard tool steel insert
- Cutting capacity up to .040" (1.016mm) in the rear area, .024" (0.610mm) in front

Package Contains	Order Number
1	i00265

Heavy Wire Cutter

- Gearing down plier, permits to cut wires up to .070" effortlessly
- Plastic handles

Package Contains	Order Number
1	ECi0177

Ligature Cutters

- Soft ligature wire only - up to .020" (0.508mm)
- All edges of lock are lip safe for intraoral use
- Fine tips for easy intraoral access
- Pliers will cut wires up to the very tip
- Hard tool steel inserts are diamond honed

Description	Package Contains	Order Number
Regular (up to .020")	1	i00552
Regular (up to .018" Soft wires)	1	T00552
Mini (up to .012")	1	i00551
Mini (up to .014" Soft wires)	1	T00551
Mini (up to .012") with long tip	1	i00571
Angled model (45°, up to .012")	1	i00572

Grinding Instrument

Description	Package Contains	Order Number
Flat smooth file (20.5cm long)	1	i00014
Flat and half round sharp file for marking the arches (13.5cm long)	1	i00015

IPR Strip System

- Ergonomic single-handed design
- Provides optimal tactile control and reduces hand fatigue
- Will not remove excessive enamel
- Prevent sharp corners or subgingival ledges
- Effective for anterior teeth, with easy access to posterior areas
- Sterilization at 134°C

IPR STRIPS	Package Contains	Order Number
Kit (32 IPR Strips)	32	ECM0894
Full Kit (32 IPR Strips + 8 optional Strips)	40	ECM0880

StarterSetStrips (6) incl. measuring gauge in aluminium case	1	ECM0941
Set with ECM0941 + Contra-angle ECM0943	1	ECM0940

Incremental Thickness Gauge

The Incremental Thickness Gauge can efficiently and accurately measure and confirm the amount of interproximal enamel removal or contact reduction.

Package Contains	Order Number
6	ECM0881

Stripping Disk

- For hand piece (diam. 19 mm - thickness 0,17 mm)

Description	Package Contains	Order Number
CA : double face	1	ECM1063
HP : double face	1	ECM1053
Protection pour disque ECM1053	15	ECM0890

Cap Removal Instrument (RMO®)

- To remove caps from convertible tubes
- Replaceable blade provides leverage when removing cap
- Tip of blade fits securely in arch slot of tube
- Each packaged instrument includes 10 replacement blades
- Stainless steel handle and blade

Description	Package Contains	Order Number
Instrument	1	i00557
Replacement blades	5	i00559

Cap Removal Plier

- This precision stainless steel instrument uses joint plier transfer to shear off convertible caps effortlessly with one fluid motion
- The slender rail design allows doctors to easily access the buccal region with little obstruction
- The blade tips feature a filleted design allowing for an easy, low-force cap removal
- Can be used on any convertible buccal tubes as well as convertible brackets
- Each packaged instrument includes two replacement blades

Description	Package Contains	Order Number
Instrument, 2 replacement blades	1	i01200
Replacement blades	5	i01201

Hex Wrench

- Stainless steel with hard steel tip
- For use with RM® Lock

Package Contains	Order Number
1	i00034

Instrument for Ascend®SL & Altitude®SL Brackets

- Stainless steel
- Recommended for opening/closing Ascend SL and Altitude SL Brackets

Package Contains	Order Number
1	ECi0882

Spatulas

- Stainless steel

Description	Package Contains	Order Number
Cement spatula (19 cm long)	1	ECM0314
Cement spatula (Ward)	1	ECM0317
Wax spatula (16 cm long)	1	ECM0315
Black spatula for composite	1	ECi0875

Drill Holder

- Secures copper soldering electrode (ECM1001) during soldering

Package Contains	Order Number
1	ECi0106

Over Fire Tweezer

- Isolated handles

Package Contains	Order Number
1	i00012

Plaster Knife

Package Contains	Order Number

Bow Divider

- Up to 5cm between spikes

Package
Contains

1

Order
Number

ECi0395

Golden Divider

- Describes/identifies "the divine proportion" in nature.
- In orthodontics, the divider is used to measure harmonious relationships in the face, radiographs and dental models
- Stainless steel - can be sterilized
- Size : 165 x 60mm (Closed)

Package
Contains

1

Order
Number

ECi0394

Clinical Caliper (Zürich model)

- Precision instrument, to measure distances accurate to within 1/10 mm
- Short (1 cm) and curved handles to permit intraoral measurements
- Double system: open, for inner measurements, and closed, for outer measurements
- Graduated slide, ideal for measuring an overjet
- Stainless steel, can be sterilized

Package
Contains

HYGIENE

Many factors come into play for a successful orthodontic treatment.

Whether for your fixed treatments or aligners, patient hygiene is one of them.

Sanitizer Gel

Hydro-alcoholic disinfectant gel for hygienic treatment or surgical disinfection of hands by friction..

Benefits

- Hypoallergenic, without additives
- Good skin tolerance
- Allows donning gloves
- Not fat.
- neutral pH

Microbiological activities

- Bactericidal effect: according to EN1040,1276 (*Pseudomonas aeruginosa*, *Escherichia coli*, *Staphylococcus aureus*, *Anterococcus Hirae*) and EN1500
- Virucidal effect: according to EN 14476 (Influenza Virus A, H1N1)
- Yeasticidal effect: according to EN1275 (*Candida Albicans*)

Composition

- Ethanol, 2-Propanol, purified water

Description	Package contains	Order Number
Bottle - 500mL	1	ECM8151

Kanipur

- One liter bottle of ready-to-use impression disinfectant
- Immersion disinfection for alginate, hydrocolloid and polyether impressions as well silicone impressions
- VAH certified
- Without formaldehyde and phenol
- Guarantees high dimensional stability of the prints
- No negative effect on plaster surfaces and impression size
- Ready to use
- Immersion time for a high organic load: Bactericidal including MRSA, yeast: 5 minutes
HBV, HIV, HCV, BVD, influenza, vaccinia virus: 1 minute

Description	Package contains	Order Number
Bottle 1L	1	ECJ0266

Orthodontic Tooth brush

Specially made to clean under wires

Description	Package contains	Order Number
Tooth brush	72	ECM8165

Disposable Toothbrushes

Description	Package contains	Order Number
Disposable toothbrushes	100	ECM8020

Tabs for Aligners

Perfect care of aligners, dentures, partial dentures and braces.

- Hygienically clean and fresh
- Contains active oxygen
- Removes plaque
- Antibacterial
- Disinfecting
- Kills 99,99% of bacteria
- Clean and fresh : 3 minutes
- Lasting disinfection : 15 minutes

Description	Package contains	Order Number
30 Tablets box	1	ECJ0267

Orthodontic Hygiene Kit

- Orthodontic Tooth brush
- Timer
- Wax
- Interproximal brush
- Travel tooth brush
- Tooth paste tube

Package contains	Order Number
15	ECM8160

LABORATORY

Since 1965, RMO® Europe has always accompanied orthodontists in their different treatment phases.

It is the same for the dental laboratories with a selection of RMO® products and from our different partners.

CONTENTS

- 288** Fulcrum Range
- 291** Burners
- 293** Laboratory Burs
- 295** Moulding
- 298** Thermoforming
- 303** Retainer Wires
- 307** Expansion Screws
- 317** Laboratory Wires
- 319** Articulators
- 323** Equipment

Fulcrum Herbst Appliance - OHA (Orthèse Herbst-Amoric)

Herbst appliance with sliding pivots allowing a certain lateral movement. You just need to slide the pivot along the wire into the desired position and tighten it with the self-blocking screw. Once in position it is integrated into a thermoforming plate. The manufacturing time is reduced with no risk of weld failure. By matching herbs and a removable appliance we benefit from better tools to orient the growth.

Description	Package Contains	Order Number
Pair of Hinges with sliding pivots	1	ECM3011
Pivots and screw Kit	1	ECM3015
Dr Amoric's book - French only	1	ECM3016
1mm Propulsion shafts	10	ECM3018
2mm Propulsion shafts	10	ECM3013

5m of 0.8mm round lab wire	1	ECM3025

Positioners

Rebasable positioner with food silicone, anatomical shape digitaly designed.

Usage

- As eruption usage guide when going from mixt dentition to permanent teeth and aligning the anterior sector
- As a positioner (after set-up and silicone adition)
- As a retainer (after silicone adition)

Package in a storage box.

Description	Package Contains	Order Number
Universal positioner (blue box)	1	ECM0130
Positioner 0mm propulsion (green box)	1	ECM0131
Positioner 4mm propulsion (yellow box)	1	ECM0132
Positioner 6mm propulsion (red box)	1	ECM0133
Silicone cartridge (50ml)	1	ECM0134
Silicone gun	1	ECM0135
Mixing tip	10	ECM0136

Lingual Screens

The lingual screen is a piece of choice in the orthodontic treatment of the anterior intraclusion, what ever arch shape. Associated to a thermoShaped splint it forces the tongue to position itself in the pallet avoiding the anterior contact.

Description	Package Contains	Order Number
Lingual screens (5 units) + storage box	1	ECM3026

Plates

Thermoforming plates are softened by heat in order to be used on a model and take its shape.

Standarcryl plates are transparent, round in a diameter of 125mm.

The Modelpack plates are white (0.4mm thick and 125mm round). They give a perfect shiny finish to your plaster models.

Description	Biostar Machine Code	Package Contains	Order Number
Modelpack plate 0.4mm	131	25	ECT0098
Standarcryl plate 0.5mm	142	25	ECT0102
Standarcryl plate 1.5mm	187	10	ECT0099
Standarcryl plate 2.0mm	207	10	ECT0100

Frontal Guiding Bars (Scheu - Dr Hinz)

For treatment of Angle Class II cases (lower jaw retrusion/distal occlusion) by means of bimaxillary appliances as well as for bilateral upper jaw expansion in growing children using an expansion screw. Made of the nickel-free alloy MENZANIUM® - nickel trace elements from 0 to 0.2 % are procedurally possible.

Description	Package Contains	Order Number
Frontal guiding bars height 14 mm and diameter 1,2 mm.	5 pairs	ECS2329
Frontal guiding bars height 18 mm and diameter 1,2 mm.	5 pairs	ECS2330
Positioning aid	5 pairs	ECS2331
Angle tester acc. to Adamik	1	ECS2332
Hinge fixator	1	ECS5374

IST® Kit HF 9

Intra-oral anti-snoring device, pressure-moulded. Connection between upper and lower jaw is achieved by continuously adjustable HF telescope. Lower jaw and tongue are advanced by protrusion.

Contents: 2 telescopes, 4 DURAN® (2.0 mm), 4 ISOFOLAN®, resin, 4 fastening elements with O-ring, 4 anchors, Alastik chain, silicone tube, security key, SD box for patient, occlusion trainer, 2 cleansing powder bags of 15 g, instructions and patient information.

Description	Package Contains	Order Number
IST® Kit HF 9	1	ECS5461
Hinge HF 9 • min. length 22mm • max. length 39mm stroke = 9mm • length to be activated = 5mm	1 pair	ECS5450
Hinge HF 15 • min. length 28mm • max. length 51mm stroke = 15mm • length to be activated = 5mm	1 pair	ECS5452
Fastening elements for IST® appliance	4 pairs	ECS5457
Fastening elements for IST® and Herbst appliances	4 pairs	ECS5468

OPM Kit

For simple fabrication of a pressure moulded OPM protrusion splint in snoring therapy. Activation is done in 1mm steps by replacing the plastic bars on both sides. Kit includes 6 pairs of plastic bars (25 - 30 mm long), 4 fastening elements with O-rings, 1 bag of cleansing powder of 15 g, occlusion trainer, silicone protection tube.

Description	Package Contains	Order Number
OPM kit	1	ECS5495
Positioning aid for OPM Plastic bars (O°/O°)	1	ECS5496
OPM Plastic bars (25 - 30mm)	6 pairs	ECS5494

Mini-Flam Blowtorch

Accurate welding torch, adjustable intensity, from small to large flame

Description	Package Contains	Order Number
Mini-Flam Blowtorch	1	ECM0322
Gaz bottle	1	ECM0323

Micro-Burner

Piezo ignition system. Accurate adjustment of intensity and output of the flame.

Description	Package Contains	Order Number
Micro-burner	1	ECM0354
Gaz bottle	1	ECM0325

Welding Accessories ISOFLAM Paste

Insulates materials from heat up to 3,000°C, prevents burning.

Package Contains	Order Number
1	ECM0329

Silver Solder

For Tru-Chrome® wires (Nickel/Chrome)
Flux incorporated in solder tubing.

Bowls

Description	Package Contains	Order Number
Alginate bowl 600cc	1	ECM7006
Plaster bowl 900cc	1	ECM7013

Spatulas

Description	Package Contains	Order Number
Metallic for plaster and alginate	1	ECM7007
Plastic for plaster and alginate	1	ECM7041

Plaster Cutter & Knife

To prepare and trim the model

Description	Package Contains	Order Number
Plaster Cutter	1	ECM7042
Plaster Knife	1	ECT0003

Rubber Model Base

Columbia model, pre-cut. Flexibility of the rubber simplifies removal of the model. Ensures uniformity of model bases (American size form).

Description	Package Contains	Order Number
Small	1 pair	ECM0201
Medium	1 pair	ECM0202
Large	1 pair	ECM0203
Extra large	1 pair	ECM0204

Plastic Model Bases (Dr Hinz)

"American size" form, protects models and maintains occlusion. Manufactured of extra-hard polystyrene. Simplify case classification with tri-dimensional model holder. Delivered with illustrated instructions.

Description	Package Contains	Order Number
"American size" bases with hinges	10 pairs	ECM0218
Replacement hinges	10	ECM0218C
Tridimensional model holder	1	ECM0219

Model Storage Boxes (cardboard)

- 3 sets of models per box.

Description	Package Contains	Order Number
Standard model (22 x 15.5 x 5 cm)	100	ECM0208
Raised model, for articulator models	50	ECM0238

RMO® Europe Plaster

for orthodontic purpose

Description	Package Contains	Order Number
Hard • Handling: 7 to 8mn • Setting: 12 à 14mn • Expansion: 0,18% •	25kg	ECM0342
Extra-Hard • Handling: 5 to 6mn • Setting: 10 à 12mn • Expansion: 0,13% ²	25kg	ECM0344

Snow White Plaster

Fast Setting White Plaster

Description	Package Contains	Order Number
<ul style="list-style-type: none"> Setting 3-5 min Expansion after 2 h 0,01-0,12 % Compressive strength after 1 hour > 25 N/mm Mixing ratio: 100 g : 94 ml 	20kg	ECM0245

Model Gloss

Ensures smooth and polished finish. (1 liter)

Package Contains	Order Number
1	ECM0207

Insulating Agents

To isolate plaster models during the manufacture of positioners and mouthguards. Guarantees absolute transparency and smooth interior surfaces.

Description	Package Contains	Order Number
For plaster	0,5 l	ECS8364
For thermoforming technique (Bioplast)	0,5 l	ECS3189

Biocryl® Resin

Special orthodontic acrylic for attaching clasp arms and relining expansion screws when pressure-moulding retention and expansion plates.

Description	Package Contains	Order Number
Polymer (400 g)	1	ECS3221
Polymer (1kg)	1	ECS3221-2
Monomer (250 ml)	1	ECS3218
Monomer (500 ml)	1	ECS3218-2

Steady Resin S

Cold-curing resin for the "salt and pepper" technique. This polymer meets the requirements of the "salt and pepper" technique, such as high stability and optimum wettability.

Description	Package Contains	Order Number
Polymer (1kg)	1	ECS8134

Steady Resin M

Cold-curing resin for the "premix" technique. Characterised by a wide processing range and excellent modelling properties.

Description	Package Contains	Order Number
Polymer (1kg)	1	ECS8135

Résine Steady S+M

Le monomère peut-être utilisé universellement pour toutes les versions de polymères Steady. Le monomère coloré peut être mélangé avec les monomères colorés Steady.

Description	Package Contains	Order Number
Monomer, clear (0,5l)	1	ECS8136
Monomer, pink (0,5l)	1	ECS8137

Steady Resin Coloured Monomer

Ready-to-use coloured monomers for use with STEADY-RESIN S, and M. Façon de 100 ml.

Description	Package Contains	Order Number
Blue	1	ECS8351
Yellow	1	ECS8352
Red	1	ECS8353
Black	1	ECS8354
Green	1	ECS8355
Purple	1	ECS8356

Orthoresin

Description	Package Contains	Order Number
Orthoresin Liquid 1000 ml Clear	1	ECM4204
Orthoresin Powder 500g	2	ECM4203

Mica

For individual use with STEADY-RESIN polymer. 50g bottle.

Description	Package Contains	Order Number
Silver	1	ECS8144
Gold	1	ECS8145
Blue	1	ECS8146
Red	1	ECS8147
Green	1	ECS8148

Pellets

Stainless steel pellets (1kg)

Package Contains	Order Number
1	ECS3222

Couverture de Granulés

Used for covering stainless steel pellets while pressurising splints. Cover is reusable and avoids adhesion of pellets to the heated soft material.

Description	Package Contains	Order Number
Large	5	ECS3006
Small	5	ECS3007

Thermoforming Material

Many different plates foils exists covering most of orthodontic needs. Each one will exist in different thicknesses & colors, round or square. They all have a code that will automatically set the Biostar to the best settings for each one. We recommend to use the proper burs for each type of foil. The Scheu Dental foils are non toxic according to the DIN V13930 standard and totally biocompatible.

They can also be provided upon request in 120mm.
Larger quantity packaging is also available upon request.

Biocryl® C

Break-resistant acrylic material of pure PMMA, monomer-free, without allergenic irritants, bonds to acrylic. Application : Immediate dentures, orthodontic plates and retainers

Description	Shape	Color	Package Contains	Order Number
2,0 x 125 mm	Round	Clear	10/100	ECS3147
2,0 x 125 mm	Round	Red	10	ECS3149
2,0 x 125 mm	Round	Blue	10	ECS3150
2,0 x 125 mm	Round	Yellow	10	ECS3151
2,0 x 125 mm	Round	Pink clear	10/100	ECS3152
3,0 x 125 mm	Round	Clear	10/100	ECS3153

Biocryl® M

Hard-elastic, monomer-free material, without allergenic irritants, bonds to acrylic. Application : Orthodontic plates and retainers

Description	Shape	Color	Package Contains	Order Number
2,0 x 125 mm	Round	Multicolor Kit	10	ECS3228
2,0 x 125 mm	Round	Polka - dots	10	ECS3229
2,0 x 125 mm	Round	Zebra	10	ECS3230
2,0 x 125 mm	Round	Rainbow	10	ECS3231
2,0 x 125 mm	Round	Tiger	10	ECS3232
2,0 x 125 mm	Round	Camouflage	10	ECS3233

Imprelon®

Hard material, not elastic, bonds to acrylic. Application : Material in clear and opaque for impression and medical trays, material in white for chin caps and bite registration.

Description	Shape	Color	Package Contains	Order Number
3,0 x 125 mm	Round	Natur	10/100	ECS3361
2,0 x 125 mm	Round	Clear	10/100	ECS3164
3,0 x 125 mm	Round	Clear	10/100	ECS3168
3,0 x 125 mm	Round	White	10/100	ECS3274

Imprelon® S PD

Extremely break and abrasion resistant material. New formulation! Already pre-dried and vacuum sealed for instant use. Application : Miniplast splints, retention splints

Description	Shape	Package Contains	Order Number
0,5 x 125 mm	Round	10	ECS3320
0,75 x 125 mm	Round	10	ECS3322
1,0 x 125 mm	Round	10	ECS3324
1,5 x 125 mm	Round	10	ECS3326
2,0 x 125 mm	Round	10	ECS3328
3,0 x 125 mm	Round	10	ECS3330

Duran®

Hard-elastic transparent material, bonds to resin.
No pre-drying required. Application : Miniplast splints, occlusal splints, interim and fluorisation splints

Description	Shape	Package Contains	Order Number
0,4 x 125 mm	Round	10	ECS3470
0,5 x 125 mm	Round	10	ECS3411
0,625 x 125 mm	Round	10	ECS3409
0,75 x 125 mm	Round	10	ECS3413
1,0 x 125 mm	Round	10	ECS3415
1,5 x 125 mm	Round	10	ECS3417
2,0 x 125 mm	Round	10	ECS3419
3,0 x 125 mm	Round	10	ECS3421

Duran® +

Hard-elastic transparent material, bonds to resin. With integrated insulation foil.
No pre-drying required. Application : Miniplast splints, occlusal splints, interim and fluorisation splints, X-ray/drilling templates, anti-snoring devices, temporary crowns and bridges, invisible retainer.

Description	Shape	Package Contains	Order Number
0,4 x 125 mm	Round	10	ECS3472
0,5 x 125 mm	Round	10	ECS3426
0,625 x 125 mm	Round	10	ECS3428
0,75 x 125 mm	Round	10	ECS3430
1,0 x 125 mm	Round	10	ECS3432
1,5 x 125 mm	Round	10	ECS3434
2,0 x 125 mm	Round	10	ECS3436

Durasoft® PD

Unbreakable, abrasion-resistant, transparent compound material with a hard and soft side. Hard side bonds to acrylic. Already pre-dried and vacuum-sealed for instant use. Application : Miniplast splints, bruxism splints, occlusal splints

Description	Package Contains	Order Number
0,7 mm hard & 0,5 mm soft / 1,2 x 125 mm round	10/100	ECS3342
0,9 mm hard & 0,9 mm soft / 1,8 x 125 mm round	10/100	ECS3388
1,6 mm hard & 0,9 mm soft / 2,5 x 125 mm round	10/100	ECS3387
2,1 mm hard & 0,9 mm soft / 3,0 x 125 mm round	10/100	ECS3341
3,1 mm hard & 0,9 mm soft / 4,0 x 125 mm round	10/100	ECS3345

Bioplast® Multicolor

Soft, pliable rubber like material, does not bond to acrylic.
Application : Coloured mouth guards, positioners

Description	Package Contains	Order Number
BIOPLAST® MULTICOLOR Germany	10	ECS3390
BIOPLAST® MULTICOLOR France	10	ECS3391
BIOPLAST® MULTICOLOR Italia	10	ECS3392
BIOPLAST® MULTICOLOR Spain	10	ECS3393
BIOPLAST® MULTICOLOR Sweden	10	ECS3394
BIOPLAST® MULTICOLOR Brasil	10	ECS3395
BIOPLAST® MULTICOLOR Transylvania	10	ECS3396
BIOPLAST® MULTICOLOR Atlantis	10	ECS3397
BIOPLAST® MULTICOLOR White dots	10	ECS3398
BIOPLAST® MULTICOLOR Green dots	10	ECS3399
Assortment (1 of each)	10	ECS3400

Bioplast® Multicolor

Soft, pliable rubber like material, does not bond to acrylic.

Application : Coloured mouth guards, positioners. Package contains : 10.

Description	Order Number
Blue-transparent	ECS3356
Red-transparent	ECS3355
White	ECS3445
Black	ECS3448
Neon red	ECS3352
Neon green	ECS3353
Azure	ECS3354
Assortment	ECS3271

Bioplast® Xtreme

BIOPLAST® XTREME material is ideally suited for simple and safe preparation of individual mouth guard.

Hard V-shaped reinforcement layer ensures additional protection in the anterior region, allowing precise positioning in the desired extension.

Soft layer can be used for lamination with BIOPLAST® or for insertion of the counter bite.

Description	Package Contains	Order Number
BIOPLAST® XTREME red kit 5.0x125 mm	kit	ECS3283
BIOPLAST® XTREME blue kit 5.0x125 mm	kit	ECS3284
BIOPLAST® XTREME black kit 5.0x125 mm	kit	ECS3285
BIOPLAST® XTREME red 4.0x125 mm	10	ECS3295
BIOPLAST® XTREME blue 4.0x125 mm	10	ECS3296
BIOPLAST® XTREME clear 4.0x125 mm	10	ECS3298
BIOPLAST® XTREME black 4.0x125 mm	10	ECS3297
BIOPLAST® XTREME red 5.0x125 mm	10	ECS3286
BIOPLAST® XTREME blue 5.0x125 mm	10	ECS3287
BIOPLAST® XTREME black 5.0x125 mm	10	ECS3288
BIOPLAST® XTREME clear 5.0x125 mm	10	ECS3289

Bioplast® Xtreme Pro

For professional sports where hard and flat impacts often occur. Additional hard-elastic for integrated reinforcement in the anterior region.

Kits come with 1 BIOPLAST® XTREME 4.0 x 125 mm, 1 BIOPLAST® clear 2.0 x 125 mm, 1 DURAN® 0.75 x 125 mm, 1 bag of 15 g cleansing powder, 1 BIOPLAST® insulating agent, retainer box.

Description	Package Contains	Order Number
BIOPLAST® XTREME Pro red kit	kit	ECS3292
BIOPLAST® XTREME Pro blue kit	kit	ECS3293
BIOPLAST® XTREME Pro black kit	kit	ECS3294

Silicon Spray Lobosil

Bioplast® plate insulation or 3D models

Package Contains	Order Number
400ml	ECM1071

Bioplast® / Bioplast® Bleach

Soft pliable rubber like material, best suited for fabrication of bleaching splints. Material does not bond to acrylic.

Description	Shape	Color	Package Contains	Order Number
1,5mm	Round	Clair	10	ECS3183
2,0mm	Round	Clair	10	ECS3185

3,0mm	Round	Assortiment	10	ECS3271
1,0mm	Ronde	Bleach	10	ECS3190

Copyplast®

Visco-plastic material, does not bond to acrylic, opaque. Application : Duplication moulds, bleaching splints, bracket transfer masks, copings, moulds for temporary crowns and bridges

Description	Shape	Package Contains	Order Number
0,5 x 125mm	Round	10	ECS3177
0,75 x 125mm	Round	10	ECS3169
1,0 x 125mm	Round	10	ECS3179
1,5 x 125mm	Round	10	ECS3175
2,0 x 125mm	Round	10	ECS3181

Copyplast® C

Transparent, visco-elastic material, unbreakable and abrasion resistant, does not bond to acrylic. Application : Long term and invisible retainers, orthodontic splints

Description	Shape	Package Contains	Order Number
1,0 x 125mm	Round	10	ECS3403

Isofolan®

Foil ensures optimum insulation for plaster against resin in the pressure moulding technique. Best suited as spacer foil when pressurising hard-elastic material for splints.

Description	Shape	Package Contains	Order Number
0,1 x 125mm	Round	100	ECS3207

Sticky Wax

- For typodonts and thermoforming techniques
- For better setting of metal/resin teeth into the typodont malocclusion waxes.

Description	Package Contains	Order Number
Box of 12 sticks	1	ECM0309

OSAMU-Retainer® Kit

Transparent retainer acc. to Dr. Yoshii. Pressure-moulded using BIOPLAST® 1.5 mm and IMPRELON® S pd 0.75 mm and OSAMU Bond for optimal compound of material. The OSAMU-Retainer® Kit includes 10x IMPRELON® S pd (0.75 x 125 mm), 10x BIOPLAST® (1.5 x 125 mm) and 10 ml OSAMU-bond for fabrication of 10 retainers.

Description	Package Contains	Order Number
OSAMU-Retainer® Kit	kit	ECS3242
Osamu-Bond	10	ECS3246
Osamu polisher (gris)	2	ECS3247

Blue - Blokker

Light-curing, blue-transparent blocking-out and modelling putty with optimum flow properties. For fabrication of space holders for bleaching splints and medical trays as well as for sealing and blocking set-up models.

Description	Package Contains	Order Number
Kit 4x1,5g, 2 cannula 0,6mm, 8 cannula 0,9mm	1	ECS5276
Micro-cannula 0,4mm	5	ECS5277
Cannula micro 0,6mm	5	ECS5264
Cannula mini 0,9mm	5	ECS5278

Skin Packaging

Protection packaging for sending out high quality models, consisting of cardboard and coating foil.

Description	Package Contains	Order Number
Skin Packaging	100	ECS3206
Coating foils only (0,15 x 125 mm)	100	ECS3203

Foam Discs

Foam discs can be used as space holder and insulation for pressure moulded impression trays, providing retention to impression material.

Package Contains	Order Number
10	ECS3444

Durasplint® Kit

High-transparent cold-cure resin specifically designed for fabricating occlusal splints with adjusted occlusion. Very simple to use, little shrinkage, optimised trimming. Available as polymer and monomer or as a kit, incl. 200 g polymer and 100 ml monomer, mixing and dosing cup, 20 ml orthodontic insulating agent incl. brush, pipette, glass spatula and detailed instructions.

Description	Package Contains	Order Number
Durasplint® Kit	kit	ECS3257
Durasplint® Polymer	200g	ECS3258
Durasplint® Monomer	100ml	ECS3259

3-Strand Flat Lingual Retainer Wire

A bonded, flat wire for permanent or semi-permanent retention of tooth position after treatment is well known. Bonded to the lingual surface, it is aesthetic, unobtrusive, and requires little patient cooperation.

- Made of fully annealed 302SS 3-Strand wire
- Wire is thin and flat, with dimensions of .010 x .028 (0.25mm x 0.71mm)
- Full annealed to allow for intricate formation
- 6'' (152mm) Lengths
- Wires are sold in packs of 10 per tube.

Description	Package contains	Order Number
.010 x .028	10	W3L0510

TRU-CHROME® Stainless Steel Retainer Wire, No. 2 Temper

- Retainer Wire, No. 2 Temper is softer than arch wire, which enables the operator to more easily form the wire into retainer appliances
- Forming of the wire work-hardens the wire and provides a working resiliency for those types of appliances
- Length = 35,56cm

Diameter	Package contains	Order Number
.028" (0,711mm)	10	E00080
.030" (0,762mm)	10	E00081
.032" (0,812mm)	10	E00082
.036" (0,914mm)	10	E00083
.040" (1,016mm)	6	E00084

TRU-CHROME® Stainless Steel Retainer Clasp Wire

- Clasp Wire Temper is between the resilient arch wire and the retainer wire
- It is soft enough to be instrument formed to the clasp configuration
- Forming gains sufficient hardening for the pliering to have satisfactory spring resiliency for clasp
- Length = 30cm

Diameter	Shape	Package contains	Order Number
.028" (0,711mm)	Round	5	E00065
.032" (0,812mm)	Round	5	E00064
.036" (0,914mm)	Round	5	E00063
.040" (1,016mm)	Round	5	E00062
.057" (1,447mm)	Half round	5	E00071

RMO® Blue Elgiloy® (soft)

- Recommended when the wire to be used is .030 or larger and when considerable bending or soldering is required

Diameter	Package contains	Order Number
.030" (0,762mm)	10	E00230
.032" (0,812mm)	10	E00232
.036" (0,914mm)	10	E00236
.038" (0,965mm)	10	E00221
.040" (1,016mm)	6	E00237
.045" (1,143mm)	6	E00238
.060" (1,524mm)	5	E00226

3D® D.Y.S. Module

- Available in .036" and .040" TRU-CHROME® Stainless Steel.
- Universal lingual attachment
- Multiple fixed/removable lab-made appliances for individual needs

Description	Wire Size	Package Contains	Order Number
Maxillary Right/Mandibular Left	.036"	5	A04350
Mandibular Right/Maxillary Left	.036"	5	A04351
Maxillary Right/Mandibular Left	.040"	5	A04352
Mandibular Right/Maxillary Left	.040"	5	A04353

3D® Transfer System

- Reduces time consuming laboratory related procedures
- Laboratory impression can be taken during active treatment (No need to stop treatment)
- Laboratory can produce very accurate Fixed/Removable appliance
- A time/cost saver; excellent for in-practice and outside 3D laboratory appliance fabrication procedures

Description	Package Contains	Order Number
3D® Transfer Insert	10	A04198
3D® Transfer Lingual Tube	10	A04199

Hawley Labial Retainer Forms – Unheat-treated

- Blue Elgiloy® .030" (0.762mm) is easily contoured
- "Serrated" end sections provide stability in acrylic

Size (inch)	Size (mm)	Package Contains	Arch Contour	Nonarch Contour

	.074" (1.905mm)	10	A00296

Adams Clasp, TRU-CHROME® Stainless Steel

- Preformed modified arrow clasp form
- May be used as is or adapted to contact tooth surface according to Adams' technique
- Manufactured loop set at 20° angle for better interproximal slippage
- Clasps are measured midline of loop to midline of loop

Size (Mesial Distal)	Package Contains	Order Number
(6mm)	10	ECS2104
(7mm)	10	ECS2105
(8mm)	10	ECS2106

0,8mm	10	ECS2050
0,9mm	10	ECS2051
1,0mm	10	ECS2052
1,2mm	10	ECS2053

Also available in 100 and 1000 units

Retainer Clasp - Arrow

- Menzanium - Nickel free!

Diameter	Package Contains	Order Number
0,7mm	10	ECS2055
0,8mm	10	ECS2056

Also available in 100 and 1000 units

Retainer Case

- Made of high impact polypropylene, prevents breakage
- Easy-open finger holds with durable hinge and positive-click closure
- Built-in keyhole to carry on key chain or backpack
- Ventilation holes that prevent odors
- Standard size holds upper or lower retainers or a positioner
- Lab size holds bionators or special lab appliances

Description	Color	Package Contains	Order Number

Articulators: The Sam® System

Over the years, the SAM® articulator has become the complementary tool of many orthodontists who want to have a precise means of dynamic analysis of the occlusion of their patients.

It is part of a complete and modular diagnostic system. This articulator is a valuable aid for:

- The diagnosis, by allowing to identify the situations at risk, through the problems of the temporomandibular articulation
- Therapeutic control
- The contention, by its contribution to the manufacture of gnathological positioners
- Orthodontic therapy by elastodontology

Sam® SE "Special Edition"

SAM® SE articulator „Special Edition“ (high-performance plastic from aircraft and automotive industry with integrated curvature 1 and bennett guides with normal sideshift and a flat incisal table)

Description	Package contains	Order Number
Articulator - Single	1	ECA ART 615M
Available in MPS*. Contains :	1	ECA ART 616MK
<ul style="list-style-type: none"> ▪ 1 SAM® SE articulator ECA ART 615 M ▪ 1 transferbow ECA ATB 303 ▪ 1 transfer fork ECA ATB 305 ▪ 1 nasal support ECA ATB 392 ▪ 10 Hygienic earpiece caps ECA ATB 240 ▪ 1 facebow ECA ATB 233 ▪ 1 acrylic XL ECA ATB 234 ▪ 1 mounting plate MPS* ▪ 1 translucent packing ECA ART 598 		

* The MPS system uses magnetic plates

Sam® 2 'P' Articulator

Same model as the old SAM® 2 "C", but 15 mm higher.

Possible use with the Axiosplit® and / or MPS * system

Description	Unité de Vente	Référence
Articulator - Single	1	ECA ART 300
with MPS* system	1	ECA ART 315M
Full kit (articulator, 20 mounting plates, packing, transferbow Axioquick® kit and Transferstand kit)	1	ECA ART 301K
ECA ART 301K with axiomatic fork ECA ATB 395	1	ECA ART 304K
Full kit (articulator, 20 mounting plates, packing, transferbow Axioquick® kit and Transferstand kit) with MPS* system	1	ECA ART 316MK
ECA ART 316MK with axiomatic fork ECA ATB 395		ECA ART 319MK
Transfer fork Acrylic XL to order separately	1	ECA ATB 334

* Le système MPS utilise des plaques aimantées

ECA ATB 395

ECA ATB 334

Sam® 2 'PX' Articulator

Intermediate articulator between SAM 2 "P" and SAM 3.
The upper arm does not disconnect, after opening, of the lower arm.

Description	Package contains	Order Number
Articulator - Single	1	ECA ART 400
With MPS* system	1	ECA ART 415M
Full Kit	1	ECA ART 401K
Full Kit + MPS* system	1	ECA ART 416MK
Full Kit + MPS* system + Axomatic fork option	1	ECA ATB 417MK

* The MPS system uses magnetic plates

Sam® 3 Articulator

New technology. With condylar housings No. 2, propulsion screws and an adjustable incisor table. The upper arm does not disconnect, after opening, of the lower arm.

Description	Package contains	Order Number
Articulator - Single	1	ECA ART 550
Full kit (articulator, 20 mounting plates, packing, transferbow Axioquick® kit and Transferstand kit, Bennett wings, condylar housings)	1	ECA ART 551K

Axioquick® Transfer Bow Kit

Axioquick® anatomic transfer bow kit with removable fork.

Description	Package contains	Order Number
Full kit : Contains :		
<ul style="list-style-type: none"> ▪ 1 Transferstand AX ECA ATB 303 ▪ 1 Transferstand AX ECA ATB 305 ▪ 1 nasal support ECA ATB 392 ▪ 1 Hygienic earpiece caps ECA ATB 240 	1	ECA ATB 350K
ECA ATB 350K with axiomatic fork ECA ATB 395	1	ECA ATB 390K
Transferstand AX	1	ECA ATB 398

Mandibular Position Indicator (MPI)

Diagnostic device for SAM® 2 and SAM® 3 articulators.

Description	Package contains	Order Number
Full kit : Contains :		
<ul style="list-style-type: none"> ▪ Mandibular position indicator ▪ Universal rod ECA MPI 350 ▪ Labes (15 sheets) ECA MPI 120 	1	ECA MPI 301
• Full Kit + MPS* system	1	ECA MPI 316M

* The MPS system uses magnetic plates

Mandibular-Positions-Variator (MPV)

Description	Package contains	Order Number
Special articulator based on a Sam® 3, with crossed table guides instead of condylar housings	1	ECA MPV 500
ECA MPV 500 with MPS* system	1	ECA MPV 515M

* The MPS system uses magnetic plates

ECA MPS 101K

ECA MPS 150

ECA MPS 250

Magnetic System for Mounting Plates (MPS)

Allows you to remove moldings quickly and easily. This option is available for virtually all common articulators. The yellow plates fit the SAM®, Whipmix®, Panadent® and Hanau® two-post articulators and KaVo articulators. The gray plates are for Artex®, Denar®, Quick®, Dental Hoby®, Balance® and Hanau® articulators.

- There are two starter kits depending on your needs
- Additional mounting plates are available (per 20 and per 100 pieces)
- The kits come with a detailed instruction manual
- Consult us for the model adapted to your articulator

Description	Package contains	Order Number
MPS* screws kit	1	ECA MPS 101K
Yellow mounting plates	20	ECA MPS 150
Grey mounting plates	20	ECA MPS 250

* The MPS system uses magnetic plates

Mounting Plates with Screw Thread

Additional plates for SAM® 2 & SAM® 3

Package contains	Order Number
1	ECA ART 120

Axiosplit®

The Axiosplit® is a system that allows quick and precise exchange of models from one articulator to another. Very useful for exchanging moldings, for example, between the cabinet and the laboratory, keeping the same settings.

Description	Package contains	Order Number
Axiosplit® kit for SAM® 2 P articulator	1	ECA ASP 510K
Mounting plate for Axiosplit®	20	ECA ASP 420
Axiosplit® kit for laboratory	1	ECA ASP 515K

ECA ASP 420

ECA ASP 515k

Axiograph®

The SAM® system allows axiographic recording with the Axiograph® III complete kit. This kit is presented in a suitcase, with more than 30 accessories. All items are available separately. The description of the accessories needed for axiography is given in the illustrated SAM® catalog.

Description	Package contains	Order Number
Axiograph® III	1	ECA AXO 500
Axiograph® digital - Axiotron® version PC	1	ECA AQR 100

Bennett Guides

Includes one pair of bennett guides:
green (ECA ART 176) / blue (ECA ART 177) / red (ECA ART 178)

Package Contains	Order Number
1	ECA ART 170

Protrusion Insert Set

Includes 2 pieces of each protrusion insert : white (ECA ART 181) / yellow (ECA ART 182) / green (ECA ART 183) / red (ECA ART 184) / blue (ECA ART 185) / black (ECA ART 186)

Package Contains	Order Number
1	ECA ART 180

Hygienic Earpiece Caps

Disposable blue caps

Package Contains	Order Number
200	ECA ATB 240

The SAM® articulators can be available in certain markets upon request from RMO® Europe, or online at www.rmoeurope.com

OMEC Laser Welder

Wizard 60 model.

Wizard is the ideal laser welder for dental, goldsmith and eyewear laboratories. It combines a very high working power, low consumptions and lamp long life. It is an appliance small in size but has a powerful water and air cooling system. It has a 7" touch screen display and joystick to select welding parameters.

The wide chamber is of easy access thanks to the large front door and is light by led cold lights. The appliance is equipped with 10x Leica stero-microscope with 45° inclination and a web-cam placed on its view axe by which it is possible to see all objects being welded on the web cam screen.

Description	Package Contains	Order Number
OMEC Welder	1	ECM0250
Adjustable stand	1	ECM0251

Accessories for RMO 660-XP® Welder

Auxiliary Cables

- For auxiliary functions of soldering, annealing, heat-tempering and stress-relieving with RMO® equipment
- Cables, complete with brass tips, vise tip and carbon soldering tip

Package Contains	Order Number
1 paire	J00431

Auxiliary Plug-in Vise

Package Contains	Order Number
1	J00432

Auxiliary Plug-in Vise

- Replaces one cable when a stationary grip is required on wire to solder on an accessory
- Two vises clamp arch wire

Package Contains	Order Number
1	J00433

Heat-Treat Table

Package Contains	Order Number
1	J00427

Replacement Vise Assembly

- For J00427 Heat-Treat Table

Package Contains	Order Number
1	H00507

Sandpaper Disc for 660-XP Welder

- Prevents debris from falling into the auxiliary receptacles
- Used to clean soldering tips of dried flux and solder. Place on top of welder under auxiliary plug-in units

Package Contains	Order Number
5	H00045

Accessories for RMO 660-XP® Welder

Description	Package Contains	Order Number	
Carbon tip for auxiliary cables	2	H00083	
Metal tip and vise for auxiliary cables	1	H00091	
Metal tip and carbon tip holder for auxiliary cables	1	H00092	
Lower ball electrode	1	H00101	
Lower soldering electrode	1	H00102	
Lower anvil electrode	1	H00103	
Lower pointed electrode	1	H00104	
Upper grooved electrode	1	H00105	
Upper electrode for carbon tip	1	H00106	
Upper blunt electrode	1	H00107	
Upper pointed electrode	1	H00108	
Carbon tip; use with H00106 electrode	3	H00109	
Lower turret with electrodes	1	H00113	
Fuse for J00060 (110 V)	1	H00500	
Fuse for J00644 (230 V)	1	H00501	
White knob for 660 Welder	1	H00506	
Wrench for electrodes	2	H00509	

Biostar® Scan

Universal thermoforming device for all dental and orthodontic thermoforming operations with optical reading of the bar codes of the plates and a working pressure of 0.5 to 6 bar. The thermally controlled infrared lamp reaches its working temperature in one second. All parameters are programmed using the optical reader, the codes are indicated and controlled on a large screen.

- The large model tank facilitates the coating of models with a large base.
- The large drawer guarantees the optimum dosage and storage of the granules.
- Dimensions: l. 450 x H. 230 x D 260 mm

Package Contains	Order Number
1	ECS3001

Ministar® Scan

Small, handy device for all simple thermoforming applications. Built on the basis of the operating principle of Biostar with optical reading of the bar codes of the plates.

- Working pressure: 0.5 to 3 bar
- Ministar®: 230 V; 850 W; Weight: 9 kg
- Dimensions: l. 420 x H. 190 x D 350 cm

Package Contains	Order Number
1	ECS3501

Polishing Lathe

- Two speed motor (1,400-2,800 r.p.m.), 350 Watts
- Available models: 100-110 V./50-60 Hz; 220 V./50-60 Hz and 240 V./50-60 Hz
- Extremely quiet
- Large base, rubber feet ensure stability
- On/Off light

Description	Package Contains	Order Number
Polishing Lathe	1	ECM0519
Rubber Splash Guard	1	ECM0520

Perfecta Micromotor

- Speed (2,000 to 35,000 r.p.m.) controlled by a microprocessor
- Ergonomical control panel, protection against overloads, smooth startup, quick stop, left and right rotation

Description	Package Contains	Order Number
Micromotor Perfecta - foot control	1	ECM1521
Micromotor Perfecta - table control	1	ECM1522
Micromotor Perfecta - knee control	1	ECM1523

Model Trimmers

Dual Wheel Model Trimmer Equipped with two 450 Watt, 1,400 R.p.m. motors which may be activated independently or simultaneously.

Two manually adjustable valves for independent regulation of water flow to the two abrasive disks. Equipped with a solenoid valve for automatic control of water flow.

Trimmer delivered with a graduated height gauge and a model holding device.

Description	Package Contains	Order Number
Dual Wheel Model Trimmer	1	ECM0213
Rough Abrasive Wheel Ø300	1	ECM0221
Smooth Abrasive Wheel Ø300	1	ECM0222
Rough Diamond wheel	1	ECM0221D
Simple goniometer	1	ECM0233
Double goniometer	1	ECM0232

Single Wheel Wet Model Trimmer

Two speed (1,400 or 2,800 R.p.m.).

Description	Package Contains	Order Number
Single Model Trimmer, with angled table	1	ECM0231
Rough Abrasive Wheel Ø257	1	ECM0225
Smooth Abrasive Wheel Ø257	1	ECM0223
Rough Abrasive Wheel Ø257 - Diamond	1	ECM0225D

Vibrators

- Power 0,40 CV, 1 400 à 2 800 t/min
- Very Quiet
- with two screw spindles
- Security light

Description	Package Contains	Order Number
Vibrator - round 16 x 13 cm	1	ECM0255
Vibrator - 22 x 16 x 10,5 cm	1	ECM0512

Steam Generator Distributor

- Supply: 230V – 50Hz
- Power: 1600 W
- Maximum pressure: 3,5 Bar
- Capacity: 3,5 L
- Dimensions: 27x35x40 h cm
- Weight: 14 Kg

Unité de Vente	Référence
1	ECM0247

Autoclave Poly

- For the hot or cold polymerization of acrylic resins under pressure
- Diameter (interior): 220 mm
- Height (interior): 210 mm
- Operating pressure: max 2 bar
- Operating temperature: max 50° C
- Weight: 3,2 kg

Unité de Vente	Référence
1	ECM4260

ALPINE SL™ CLEAR

FULLY INTERACTIVE METAL SELF-LIGATING BRACKET, WITH NICKEL-TITANIUM SPRING CLIP

Shape alloy ensures reliable clip operation and control throughout entire treatment; Rhodium-coating for aesthetically, inconspicuous appearance for exceptional comfort

- Advanced ceramic material
- Niti clip with rhodium-coating
- Easy open/close function
- Full slot-width
- Enhanced clip design
- Smooth, low-profile surface
- Tie-wing undercuts
- Ink mark
- Contoured base
- Triple-x mechanical base

--------------------	----

thank you for your support

“From my 1st day of practice and ever since, I have confidently relied upon RMO’s finest quality products and responsiveness. Each person from local rep to their top tier personnel are personable, approachable and emphasize exceptional service with enthusiasm. They know their products, which sell themselves. They discover and find ways to do it better. Also, RMDData is a most accurate analysis / prediction service which I have utilized for 40 years. The RMO team become family and your advocates. Each are experienced and knowledgeable to give their clients many advantages in practice. They do the right things exceedingly well. I very much value our relationship and their support which is simply outstanding.” - [Dr. Duane Grummons](#)

“Teaming up with RMO has been a tremendous asset for my practice. Their products always exceed my expectations, and the customer service is exceptional! I highly recommend Rocky Mountain Orthodontics!” - [Dr. Joanna Levin](#)

“Leading-edge products place RMO as an orthodontic manufacturing world leader. The constant technological evolution inspires us to always provide the best care to our patients in an easy and effective way.”
- [Dr. Gabriel Borgen: Indent, Nicaragua](#)

“It has been almost 40 years since we started working with RMO. I’m proud to say that in all these years we have not just built a solid business, but a solid partnership based on trust and loyalty.” - [Pedro J. Sancho: Ibérica de Ortodoncia, Spain](#)

“We have been proud users of RMO products for almost ten years. The products are exceptional, and their customer service is first class. What’s most impressive is we still have the same reps as when began. Their commitment to their team lets us know they will be there to support ours.”
- [Dr. Seth Newman](#)

“There’s nothing more satisfying than working with a company that for more than 85 years has cared about the excellence of orthodontic treatment by providing state of the art materials and top-quality education. When you realize that working with their people is like talking to real friends it makes the experience even more pleasurable.” - [Dr. Flavio Sanchez: Brazil](#)

"My family and I have worked for several decades as distributors of RMO and from the beginning we have found in this company absolute professionalism, friendship and ongoing support. The quality of its products and the excellence in service make our task of selling RMO products in Argentina easier and more rewarding." – **Juan Carlos Martinez: Argentina Orthodontics, Argentina**

"Having tried Many other companies out there I can honestly say that this is the best mix of quality, value, dependability and the greatest leadership and support staff out there of any brace company. These are our guys!" – **Dr. Steve Giannoutsos**

"RMO is a small, intimate company that makes you feel like family. They care about their customers as much as they care about the products they produce." – **Dr. Danielle Battisti**

"I have had a nearly 100% RMO office, including brackets, bands, wires, composites, and sundries, since 2007. I love everything about RMO, from their products to their company principles. Their product representatives deeply care about my practice on a personal level. I will always be an RMO orthodontist." – **Dr. Neal Kravitz**

"Congratulations RMO on your ongoing success. As graduate students in the UCLA orthodontic program, RMO helped us with instruments, didactic courses and invitations to continuing education at regional and national meeting. They introduced us to experienced orthodontists in LA and throughout the USA and abroad, including 'giants' in the orthodontic profession, to meet and to associate with. 37 years later, though so much has changed in our profession and in the world, the loyalty, professionalism and commitment that permeates throughout the RMO organization is a constant. Impressive. I credit the leaders of RMO, Martin Brusse, Tony Zakhem and Jody Hardy and their team." – **Dr. Richard Jacobson**

"When in Colombia we decided to market orthodontic products we never hesitated to select RMO. Today after more than 40 years of selling their products we are convinced that we were not wrong, and we are proud to be part of this family." – **Joaquin Martinez: Colombia Orthodontics, Colombia**

"We're both family businesses, and it shows in the values we have and how we work together. Proud to be in partnership with RMO. Happy 85th, and here's to the next 85 years."

- Serene Koh: KAF Enterprise, Malaysia

"Rocky Mountain Orthodontics has been integral in our success as an orthodontic practice. They offer high quality products that last. Their team is also truly top notch from top to bottom. When you work with them, they become your partner in practice, not just a vendor. Rocky Mountain Orthodontics truly is the place to go for high quality orthodontic products and exceptional service!"

- Drs. Robert & Rob Wilson

"Dentwin is proud to bring RMO's products to Vietnamese dentists for over 13 years. RMO has been recognized as one of leading orthodontic brands, providing not only high-grade products but also phenomenal speakers giving continual seminars for the orthodontic community. We strongly hope for a stunning era of partnership to come." - Nguyen Van Dung: Dentwin, Vietnam

"It is a pleasure to work with RMO since they have a wide portfolio that meets the needs of every orthodontist. They have high quality materials, provide support to lecturers and thus provide excellent courses for orthodontists in our country. Cooperation with RMO is great!" - Nadica Boskovska: Vik Dental, Macedonia

"Congratulations on RMO's 85 years anniversary. Our hat's off to RMO's long and great contributions to the world orthodontic markets. Wishing you an even higher altitude of success in the Mile-High City!" - RMMC, Japan

"We've been the RMO dealer in Algeria for a few years. I found quality products for my clients and high-level speakers and seminar programs. I can also rely on RMO efficient support and teamwork! I am happy to be part of the RMO family." - Dr. Ouadah: Medico Dental, Algeria

“Choosing to work with RMO for the last 36 years in practice, has been one of the easiest decisions I have made; and one I have yet to second guess. Their service, products, support and value are unparalleled in the industry. And their long-term support and presence at the AAO annual session- demonstrates their commitment to the specialty and the practice of orthodontics by orthodontists.”
- Drs. Ken & JK Dillehay

“Plandent from Planmeca Group has been working together with RMO for many years. This long cooperation and partnership has been possible thanks to RMO’s reliability and quality products such as: The Synergy bracket, FLI, and RMO’s Early Treatment products.” – Johanna Wicht: Plandent, Finland

“Since 1995 I’ve been working with RMO. They provide high quality materials and everything I need to practice Bioprogressive and inside a family environment. I am proud of being part of RMO family. Cheers for the 85th anniversary! The pioneer Orthodontic company aged to perfection. Saúde, amigos!” – Dr. Nelson Oppermann: Brazil

“Orthocaps joined the RMO family owing to the natural synergy between our two companies. For manufacturers of orthodontic solutions in a demanding market, it is important to establish personal relationships between the teams of interacting companies. At RMO, not only did we find a highly professional and motivated team, but also a level of honesty, that was apparent, from the CEO to the customer service staff, which has enabled us to foster true friendships with the whole team.”
- Dr Wajeeh Kahn: Orthocaps, Germany

“We are very proud to be a part of RMO, the “home” of orthodontics and for us a warm and supportive family. In the course of mutual cooperation, we have realized that alone we can only do a little, but together we can do so much more! Thank you for being an important part of our world” – Dr. Moti Michael: Smart Orthodontic Services, Israel

"We started as a dealer for RMO more 22 years ago. Since then we have added more than 15 other brands to our portfolio, but RMO is still our most reliable and trusted partner in the orthodontic business."

– Rene Angeles: PROS, Philippines

"The customer service, friendship, quality and professionalism of RMO allows them to stand out amongst so many orthodontic companies. RMO truly constitutes a close family in the orthodontic community." – Dr. Tim Auger

"We started working with RMO in the early 1970's. Together with their support and guidance we successfully developed the orthodontic market in Greece. For us RMO is not only a major business partner but above all a long-lasting friendship!" – Irene Tsaprazi: John Tsaprazis S.A., Greece

"I've been using Rocky Mountain Orthodontics products for over 25 years. I have found that their products and staff are superior to all other available options." – Dr. Brad Edgren

"Working with RMO is a great pleasure and a privilege. We are creating a great team step by step and growing together. We will always be thankful to RMO who believed in Caribemex Dental and gave us this opportunity to distribute their great products. We will continue to deliver great results throughout all of the Dominican Republic."

– Dr. Antonio Marchante: Caribemex Dental, Dominican Republic

"It was an easy choice to work with RMO from the start of my practice. To me, RMO is not a company. It's a family. In a world of corporate structure and lack of personal connection, RMO stands head and shoulders above everyone else." – Dr. Anil Idiculla

The products and deliveries of the company RMO Europe SAS are subject to these terms & conditions of sale, which are systematically included in our catalogs, our quotes and invoices. Consequently, any sale implies the unreserved acceptance of the buyer to these general conditions of sale.

All of our products are only intended for health professionals with a degree qualification.

1. Orders

To be valid, the order must specify in particular the quantity, products part numbers and the description of the products sold.

2. Price

The prices of the goods sold are those in force on the day of ordering. They are denominated in euros (€) or US dollars (\$) and are net excluding shipping and taxes.

Any duty, tax or other benefit payable under, the French regulations or those of the importing country or transit country are under the purchasers responsibility.

The applicable rates may be changed at any time without notice. However, the goods ordered are invoiced at the prices indicated at the time of processing of the order.

3. Discount

The price offered include discounts that RMO Europe would grant given the volume and/or the purchasing frequency, as well as the promotional campaigns.

4. Delivery

Delivery is made according to the order by transfer to a carrier in the premises of the seller. The goods are delivered as soon as possible after receipt or confirmation of the order. The forecasted delivery dates are indicative, therefore overrun delivery time can not give right to damages, withholding or cancellation of orders in progress.

The products travel at the recipient's risk, regardless of the means of shipping chosen, notwithstanding the ownership reserve.

It is up to the buyer, in case of damages, loss or missing goods to make all clear and precise reservations on the delivery order and, within 3 working days which follows the receipt, to notify the carrier by extra-judicial act or by registered letter, his argued claim.

5. Receipt of goods

Without prejudice to the provisions to be taken vis-à-vis the carrier, the complaints about the visible defects or non-conformity of the delivered goods must be reported within 7 days by registered letter with acknowledgment of receipt.

6. Retraction right

The purchaser may return the material listed in the catalog (not subject to specificity or particular assembly) unused, in its original packaging against a refund, exchange or credit within 14 days following the date of delivery. The administration and repackaging costs and the return risks are always under the responsibility of the purchaser.

Some products, not kept in stock or specific assembly, are however not taken back.

7. Warranty

All our materials normally used are guaranteed for a period of 1 year from the day of delivery against any defects of construction or material defect.

This warranty does not include damage resulting from negligence, miss-use, non-compliance with the instructions, or non respect of the single use of the products.

The warranty is limited to the pure and simple exchange of the part recognized by us as defective, without the buyer can claim compensation for any cause, including the labor required for disassembly and reassembly or for immobilizing of the device.

Intervention under warranty can not have the effect in extending the duration of the warranty.

8. Billing

A delivery note or invoice is drawn up for each delivery and delivered at the same time.

9. Payment

Invoices are due at the dates indicated on them. In case of draft payment, the draft must be returned accepted within two weeks of their shipment date.

Any unpaid sum after the due date appearing on the invoice entails to the application of penalties equal to three times the French legal interest rate. Late payment penalties are due without a need for a reminder and under simple request.

According to French law a fixed compensation of 40 euros is also due for the recovery costs. In the event that the recovery costs incurred are higher than this fixed price, we reserve the right to ask for additional compensation on justification.

10. Termination clause

In case of payment default, 10 days after a formal notice remaining unsuccessful, the sale will be automatically terminated by the seller and he may request the return of the products, without prejudice to any other damages.

11. Property reserve

The goods delivered remain the property of the seller until full payment. However the risks are transferred to the buyer upon delivery. He must therefore insure the goods, bear the expenses of the insurance and inform the seller of any measures taken by third parties on the concerned products.

12. Applicable law

The exclusive competent authority is the commercial chamber of the District Court of Strasbourg for any litigation. Any dispute will be submitted and French law will apply.

This clause applies in any case of ligation, incidental claims, multiple defendants or warranty claims, regardless of the method of payment, and regardless of any other attributing jurisdiction clauses potentially mentioned on the documents of the purchasers.

13. Personal data protection

The information collected on you by RMO Europe in the field of our commercial relationship is subject to an automated processing for the purpose of the accomplishment of the contract. This information is intended exclusively for RMO Europe and will be conserved according to the legal periods.

In accordance with the Regulation (EU) 2016/679 on personal data protection, you have the following rights on your data: right of access, editing right, deleting right (right to be forgotten), opposition right, limitation of treatment right, portability right. You can also set guidelines for storing, deleting and communicating your personal data after your death. You may, for reasons related to your particular situation, oppose the processing of the data concerning yourself.
